theatre is a term often used to describe the theatre of ancient Italy during the second and third century BCE Plautus and
Terence are referred to as Roman playwrights and Rome itself is generally regarded as the driving force behind the
development of theatrical culture in Italy But was this early theatre in Italy specifically or characteristically Roman Using
previously marginalised archaeological source material and placing it in constructive dialogue with the surviving ancient
literature this book offers a significant reinterpretation of how theatre developed in the Italian peninsula as well as a radical
reappraisal of the role of Republican Rome as the impetus for cultural change Challenging a long held scholarly consensus it
is argued that whilst Rome would eventually rise to political and cultural dominance the archaeological evidence does not
encourage us to view Rome as a significant factor in the development of theatre in Italy until at least the end of the first
century BCE and the construction of the Theatre of Pompey Our attention is directed instead to other cities in the Italian
peninsula during the third and second centuries BCE which have hitherto been greatly overshadowed by imperialistic
narratives of Roman cultural development **The Spirit Book** Raymond Buckland,2005-09-01 Never say die Can the living

Roman Artefacts and Society Ellen Swift, 2017 In this book Ellen Swift uses design theory previously neglected in Roman archaeology to investigate Roman artifacts in a new way making a significant contribution to both Roman social history and our understanding of the relationships that exist between artefacts and people Based on extensive data collection and the close study of artefacts from museum collections and archives the book examines the relationship between artefacts everyday behavior and experience The concept of affordances features of an artefact that make possible and incline users towards particular uses for functional artifacts is an important one for the approach taken This concept is carefully evaluated by considering affordances in relation to other sources of evidence such as use wear archaeological context the end products resulting from artifact use and experimental reconstruction Artifact types explored in the case studies include locks and keys pens shears glass vessels dice boxes and finger rings using material mainly drawn from the north western Roman provinces with some material also from Roman Egypt The book then considers how we can use artefacts to understand particular aspects of Roman behavior and experience including discrepant experiences according to factors such as age social position and left or right handedness which are fostered through artifact design The relationship between production and users of artifacts is also explored

investigating what particular production methods make possible in terms of user experience and also examining production constraints that have unintended consequences for users The book examines topics such as the perceived agency of objects differences in social practice across the provinces cultural change and development in daily practice and the persistence of tradition and social convention It shows that design intentions everyday habits of use and the constraints of production processes each contribute to the reproduction and transformation of material culture
