Albert Einstein Everyone has heard students most common complaint in math class Why do I need to learn this I ll never use it when I m older Some of us have even been that complainer Many people s difficulties with learning math in school follow them into adulthood by which time they often assume that it s too late to do anything about it But even though it s true that the average person has no need in daily life to remember what the number for Pi is and what it represents that doesn t mean that math serves no purpose for anybody with access to a calculator In Your Daily Math veteran math educator Laura Laing lays out a year s worth of exercises meant to get you thinking about math in a different way Laing s approach breaks down her 366 exercises into seven categories one for each day of the week Number Sense Algebra Geometry Application Probability Statistics Logic and Grab Bag Laing s approach treats these math and various number related logic problems as fun brain exercises Yes there are equations here but nothing that the average adult even those who always hated math class can t handle There are also graphs geometry statistics and logic problems many of them centered around problems that could occur in real life Think of Your Daily Math not as homework but instead as your daily cognitive workout
