Van Zoest,2006-03-01 This book provides examples of the ways in which 9 12 grade mathematics teachers from across North America are engaging in research It offers a glimpse of the questions that capture the attention of teachers the methodologies that they use to gather data and the ways in which they make sense of what they find The focus of these teachers investigations into mathematics classrooms ranges from students understanding of content to pedagogical changes to social issues Underlying the chapters is the common goal of enabling students to develop a deep understanding of the mathematics they learn in their classrooms Building Bridges Between Algebra and Topology Wojciech Chachólski,Tobias Dyckerhoff,John Greenlees,Greg Stevenson,2018-03-31 This volume presents an elaborated version of lecture notes for two advanced courses Re Emerging methods in Commutative Algebra and Representation Theory and Building Bridges Between Algebra and Topology held at the CRM in the spring of 2015 Homological algebra is a rich and ubiquitous area it is both an active field of research and a widespread toolbox for many mathematicians Together these notes introduce recent applications and interactions of homological methods in commutative algebra representation theory and topology narrowing the gap between specialists from different areas wishing to acquaint themselves with a rapidly growing field The covered topics range from a fresh introduction to the growing area of support theory for triangulated categories to the striking consequences of the formulation in the homotopy theory of classical concepts in commutative algebra Moreover they also include a higher categories view of Hall algebras and an introduction to the use of idempotent functors in algebra and topology **Knot Theory and Its Applications** Krishnendu Gongopadhyay,Rama Mishra,2016-09-21 This volume contains the proceedings of the ICTS program Knot Theory and Its Applications KTH 2013 held from December 10 20 2013 at IISER Mohali India The meeting focused on the broad area of knot theory and its interaction with other disciplines of theoretical science The program was divided into two parts The first part was a week long advanced school which consisted of minicourses The second part was a discussion meeting that was meant to connect the school to the modern research areas This volume consists of lecture notes on the topics of the advanced school as well as surveys and research papers on current topics that connect the lecture notes with cutting edge research in the broad area of knot theory **Graduate Courses, a Handbook for Graduate Students** ,1895 *Graduate Courses* ,1895 **Graduate Handbook ...** Clyde Augustus Duniway,Barclay W.
