thoroughly addresses two quality of life issues in patients with a variety of neurological disorders sexual and reproductive function The de vasta stating effects of a variety of neurological diseases are well known to both the lay and medical communitles and are treated in numerous texts However as we continue to experience therapeutic breakthroughs in the tielfs of neurology and rehabilitation medicine physicians and patients must become more aware of the issues discussed in this text It is particularly important as emphasized throughout the chapters that the physician or therapist initiate conversations with the patients concerning both the possibility of parenting a child as well as the ability of the patient to enhance his her sexual functioning Commonly in the patient who is otherwise perfectly normal there is a reluctance to discuss these topics and couples often feel embarrassed to initiate a conversation with their physi cians This reluctance to

initiate a discussion is even more apparent in patients with a variety of neurological disorders in which there are overriding fears concerning both function and survival as well as deep concerns about their own attractiveness and their sexual and reproductive ability
