High-Stakes Testing in Education Theo J.H.M Eggen, Gordon Stobart, 2015-10-14 High stakes educational testing is a global phenomenon which is increasing in both scale and importance Assessments are high stakes when there are serious consequences for one or more stakeholders Historically tests have largely been used for selection or for providing a licence to practise making them high stakes for the test takers Testing is now also used for the purposes of improving standards of teaching and learning and of holding schools accountable for their students results These tests then become high stakes for teachers and schools especially when they have to meet externally imposed targets More recent has been the emergence of international comparative testing which has become high stakes for governments and policy makers as their education systems are judged in relation to the performances of other countries In this book we draw on research which examines each of these uses of high stakes testing The articles evaluate the impact of such assessments and explore the issues of value and fairness which they raise To underline the international appeal of high stakes testing the studies are drawn from Australia Africa the Caribbean Europe former Soviet republics and North America Collectively they illustrate the power of high stakes assessment in shaping for better or for worse policy making and schooling This book was originally published as a special issue of *Assessment in Education Principles Policy Practice*

The History of Science and Technology in Yuan Dynasty Li Shi, The book is the volume of The History of Science and Technology in Yuan Dynasty among a series of books of Deep into China Histories The earliest known written records of the history of China date from as early as 1250 BC from the Shang dynasty c 1600 1046 BC and the Bamboo Annals 296 BC describe a Xia dynasty c 2070 1600 BC before the Shang but no writing is known from the period The Shang ruled in the Yellow River valley which is commonly held to be the cradle of Chinese civilization However Neolithic civilizations originated at various cultural centers along both the Yellow River and Yangtze River These Yellow River and Yangtze civilizations arose millennia before the Shang With thousands of years of continuous history China is one of the world s oldest civilizations and is regarded as one of the cradles of civilization The Zhou dynasty 1046 256 BC supplanted the Shang and introduced the concept of the Mandate of Heaven to justify their rule

The central Zhou government began to weaken due to external and internal pressures in the 8th century BC and the country eventually splintered into smaller states during the Spring and Autumn period. These states became independent and warred with one another in the following Warring States period. Much of traditional Chinese culture, literature, and philosophy first developed during those troubled times. In 221 BC, Qin Shi Huang conquered the various warring states and created for himself the title of Huangdi or emperor of the Qin, marking the beginning of imperial China. However, the oppressive government fell soon after his death and was supplanted by the longer-lived Han dynasty (206 BC–220 AD). Successive dynasties developed bureaucratic systems that enabled the emperor to control vast territories directly. In the 21 centuries from 206 BC until AD 1912, routine administrative tasks were handled by a special elite of scholar-officials. Young men well-versed in calligraphy, history, literature, and philosophy were carefully selected through difficult government examinations. China's last dynasty was the Qing (1644–1912), which was replaced by the Republic of China in 1912 and in the mainland by the People's Republic of China in 1949. Chinese history has alternated between periods of political unity and peace and periods of war and failed statehood, the most recent being the Chinese Civil War (1927–1949). China was occasionally dominated by steppe peoples, most of whom were eventually assimilated into the Han Chinese culture and population. Between eras of multiple kingdoms and warlordism, Chinese dynasties have ruled parts or all of China. In some eras, control stretched as far as Xinjiang and Tibet, as at present. Traditional culture and influences from other parts of Asia and the Western world, carried by waves of immigration, cultural assimilation, expansion, and foreign contact, form the basis of the modern culture of China.

Evidence and Public Good in Educational Policy, Research and Practice Mustafa Yunus Eryaman, Barbara Schneider, 2017-06-22 This volume draws together interdisciplinary approaches from political philosophy social work medicine and sociology to analyze the theoretical foundations and practical examples of evidence based and evidence informed education for the public good It presents a range of conceptions of the evidence based and evidence informed education and a justification for why the particular examples or issues chosen fit within that conception for the sake of public good It explores the current literature on evidence based and evidence informed educational policy research and practice and introduces a new term evidence free meaning actions of some policymakers who disregard or misuse evidence for their own agenda The demands about the quality and relevance of educational

research to inform the policy and practice have been growing over the past decade in response to the Evidence Based Education movement. However, the literature is yet to tackle the question of the interrelationships between evidence, research, policy and practice in education for the public good in an international context. This book fills that gap. [ECGBL 2021 15th European Conference on Game-Based Learning](#) Panagiotis Fotaris, Cate Grundy, Marcus Winter, 2021-09-23 [Dynamic Interpretation of Early Cities in Ancient China](#) Hong Xu, 2021-06-14. This book offers an archaeological study on China's ancient capitals. Using abundant illustrations of ancient capital sites, it verifies the archaeological discoveries with documentary records. The author introduces the dynamical interpretation of each ancient capital to the interpretation of the entire development history of China's ancient capitals. The book points out that for most of the almost 2000 years from the earliest Erlitou to the Ye city, there was an era where ancient capitals didn't have outer enclosures due to factors such as the strong national power, the military and diplomatic advantage, the complexity of the residents and the natural conditions. Thus, an era of the huge ancient capitals without guards lasting for over 1000 years formed. The concept that China's ancient capitals don't have outer enclosures presented in the book questions the traditional view that every settlement has walled enclosures. Combining science with theory, it offers researchers of history a clear understanding of the development process of China's ancient capitals. *Bihar Police Constable Recruitment Exam - 12 Full Length Practice Tests and 3 Previous Year Papers (1500 Solved Objective Questions) with Free Access to Online Tests* EduGorilla Prep Experts, *Making History Mine* Sarah Cooper, 2023-10-10.
