Resources in Education ,1998 *Expect More: Children Can Do Remarkable Things* Anne Grall Reichel, Ed.D.,2010-09-22 This book encourages teachers parents grandparents and volunteers who work with children to expect more It focuses on the skills children will need to compete in a highly competitive global economy From systems thinking to interpreting complex visual images to integrative thinking our children need a whole new skill set For too long science and social studies have been moved to the back burner Ironically these subjects hold great interest and opportunity to investigate concepts in depth We need to bring them to center stage Throughout the book the author provides many concrete examples of ways for teachers and parents to engage children in meaningful conversation and problem solving Somewhere along the way we seem to have stopped challenging children and started enabling them instead Perhaps this is through no fault of our own As teachers and parents we genuinely care about children We feel for them when they are sick when they are bullied or when they are struggling Quite simply it is our nature to protect With the best of intentions we tend to try and eliminate the struggle But the struggle is essential to growth and a personal sense of accomplishment As children work their way through challenges

they build the confidence and habits of mind needed to embrace the next challenge that comes along This book is an invitation to adults to expect more of themselves and of the children they care about The invitation is yours to accept

Frontiers of Fundamental Physics and Physics Education Research Burra G. Sidharth, Marisa Michelini, Lorenzo Santi, 2014-03-20 In a knowledge based society research into fundamental physics plays a vital role not only in the enhancement of human knowledge but also in the development of new technology that affects everyday life The international symposium series Frontiers of Fundamental Physics FFP regularly brings together eminent scholars and researchers working in various areas in physics to exchange expertise ideas results and new research perspectives The twelfth such symposium FFP12 took place at the University of Udine Italy and covered diverse fields of research astrophysics high energy physics and particle physics theoretical physics gravitation and cosmology condensed matter physics statistical physics computational physics and mathematical physics Importantly it also devoted a great deal of attention to physics education research teacher training in modern physics and popularization of physics The high scientific level of FFP12 was guaranteed by the careful selection made by scientific coordinators from among 250 submissions from 28 countries across the world During the three days of the conference nine general talks were delivered in plenary sessions 29 invited talks were given in specific topic areas and 59 oral presentations were made This book presents a selection of the best contributions at FFP12 with the aim of acquainting readers with the most important recent advances in fundamental physics and in physics education and teacher development
