The Suit Amy Lane, 2022-06-07 Two and a half years ago Michael Carmody made the biggest mistake of his life Thanks to the Salinger crew he has a second chance Now he s working as their mechanic and nursing a starry eyed crush on the crew s stoic suit insurance investigator and spin doctor Carl Cox Carl has

always been an almost ran so Michael's crush baffles him. When it comes to the Salingers he's the designated wet blanket. But watching Michael forge the life he wants instead of the one he fell into inspires him. In Michael's eyes he isn't an almost ran; he just hasn't found the right person to run with. And while the mechanic and the suit shouldn't have much to talk about suddenly they're seeking out each other's company. Then the Salingers take a case from their past and it's all hands on deck. For once behind the scenes guys Michael and Carl find themselves front and center. Between monster trucks, missing women, and murder birds the case is a jigsaw puzzle with a lot of missing pieces, but confronting the unknown is a hell of a lot easier when they're side by side.

THE GENE TRAP Stephen N Berberich, 2011-05-17 Change is inevitable and it is coming to the modern world as it had for a thousand centuries. A mysterious force hidden in the shadows of the cosmos holds sway over the destiny of all living things and the final chapter for mankind is about to be written. A superior species borne of humans is poised to assume dominion over the Earth. Enter The Gene Trap. This manuscript is the second in a series of techno thrillers by Dr Stephen Berberich. Similar in story line to a Michael Crichton novel, the book's plot depicts the struggle of contemporary man in his effort to avoid the inexorable consequences of evolution. As the story unfolds John Lynch and his girlfriend Gigi Thompson are on their way to Pittsburgh to begin their new careers. John as a medical intern and Gigi as geneticist at the prestigious Hawthorne Institute. Though they remain perplexed by the mysterious disappearance of their best friends Peter Gault and Kate Donavon, main characters of Berberich's first novel *No Known Species*, John and Gigi find themselves consumed by the rigors of their new positions. The last thing they need is to be caught in a titanic struggle for human survival, a struggle that would pit them against Peter's clan of mutants. Influenced by unexpected events, the couple is drawn into a sinister plot hatched by a worldwide cabal of intellectual elites who are determined to eliminate the gifted species. It is a move that could solidify mankind's rightful place of primacy. Though the elite's scheme seems flawless, unforeseen mistakes begin to occur. A deadly synthetic germ is accidentally released into the biosphere, creating a plague the likes of which the world has never known. Worse yet, a deadly trap lurks within secret recesses of the human genome. It is a genetic time bomb that will be detonated if scientists attempt to tinker with the essence of mankind's DNA. The Gene Trap details the age-old struggle between the old and the new, with Gigi and John caught somewhere between the two worlds. The final act makes clear the meaning of the genesis cycle.
