Valentino,2013-01-14 Benjamin A Valentino finds that ethnic hatreds or discrimination undemocratic systems of government

and dysfunctions in society play a much smaller role in mass killing and genocide than is commonly assumed. He shows that the impetus for mass killing usually originates from a relatively small group of powerful leaders and is often carried out without the active support of broader society. Mass killing in his view is a brutal political or military strategy designed to accomplish leaders' most important objectives: counter threats to their power and solve their most difficult problems. In order to capture the full scope of mass killing during the twentieth century, Valentino does not limit his analysis to violence directed against ethnic groups or to the attempt to destroy victim groups as such as do most previous studies of genocide. Rather, he defines mass killing broadly as the intentional killing of a massive number of noncombatants using the criteria of 50,000 or more deaths within five years as a quantitative standard. *Final Solutions* focuses on three types of mass killing: communist mass killings like the ones carried out in the Soviet Union, China, and Cambodia; ethnic genocides as in Armenia, Nazi Germany, and Rwanda; and counter guerrilla campaigns including the brutal civil war in Guatemala and the Soviet occupation of Afghanistan. Valentino closes the book by arguing that attempts to prevent mass killing should focus on disarming and removing from power the leaders and small groups responsible for instigating and organizing the killing.

The World's History Since 1100 Howard Spodek, 2000. For introductory level courses in World History. A true exploration of world history, this text presents world history through an analysis of eight chronological turning points seen through the prisms of eight different themes: origins, cities, empires, religion, trade, migrations, revolutions, and technology. Focusing throughout on three major questions—What do we know? How do we know it? What difference does it make?—it helps students make sense of the immensity of human historical experience, the most significant activities, accomplishments, and failures throughout the world from earliest times to the present. Rich in primary sources, both written and visual, and in data and interpretation, it addresses how historians form debate and revise our historical understanding of the world, shows the value of other disciplines in understanding history, and helps students begin to assess their own place in the ongoing history of the world.
