Question 1:

Could you briefly describe the multiple intelligences identified by Gardner?

Answer 1:

According to Gardner, intelligence is not a single entity. There are indeed many different types of intelligence.

Here are some key points about Gardner's thoughts on multiple intelligences.

- Intelligence is independent of each other.
- Different kinds of intelligence interact and work together to find solutions to problems.

Mr. Gardner has identified eight types of intelligence in him. Here are the details: Poets and writers are very linguistically intelligent. Logical-Mathematical skills mainly possess problem solving ability, very high on thinking logically, good at abstract reasoning and can solve mathematical problems with ease. Scientists and Nobel prize winners are good examples with Logical-Mathematical Intelligence.

Spatial skills are about understanding visual images and patterns. It refers to the ability to form, use and transform mental images. A pilot, a sailor, a sculptor, a painter, an architect, an interior his designer, a surgeon may have a highly developed spatial intelligence.

The Musical Skill provides a more detailed understanding of creating, creating, and manipulating musical patterns. A person with this intelligence is very sensitive to sound and vibration, and very sensitive to creating new sound patterns.

Physical-Kinaesthetic Using the whole body to solve a problem or assemble a product. Athletes, dancers, actors, athletes, gymnasts, and surgeons may possess such intelligence. Organize your feelings and build comfortable relationships with others. Psychologists, counselors, politicians, social his workers, and religious leaders are likely to have high levels of interpersonal intelligence, and philosophers and spiritual his leaders show examples of this kind of intelligence, increase.

Naturalistic skills involve recognizing relationships with the natural world. That is, analyzing the beauty of existing species, flora and fauna. Hunters, farmers, tourists, botanists, zoologists, and birdwatchers have a more naturalistic intelligence.
