

AP Biology – FRQ # 2

Practice Free Response Question: Biochemistry

On the AP Biology Exam this May, you will have 90 minutes to complete the free-response section that represents 50% of your score. There are four questions in the free-response section. Therefore, you will have approximately 20 minutes to complete each question. You will also have 10 minutes at the beginning to brainstorm your answers. The questions below are from previous AP Biology exams and pertain to Biochemistry. Allow yourself 20 minutes to complete all parts of the questions below on lined paper.

Tips for Success:

- Do not make an outline. You are not graded on your ability to format an essay
- Don't include an introduction or a conclusion
- Avoid topic sentences that take time away from answering the question
- Be direct and simple in your answers. The reader needs to be clear you understand
- Make sure you are answering the question exactly. Periodically re-read the question and make sure you are staying on track!

Directions: Answer all questions

Answers must be in essay form. Outline form is not acceptable. Labeled diagrams may be used to supplement discussion, but in no case will a diagram alone suffice. It is important that you read each question completely before you begin to write. Write your answers on lined paper.

Hydroxyl groups are attached to each of the carbons, and one carbon has a carbonyl group. The bonds of the carbohydrate rings are used to contain its exorbitant amount of energy which is used in most heterotrophs.

Proteins - Proteins are made up of multiple polypeptide chains which are made of amino acid chains with different R groups which define the function of the amino acids. There are 20 amino
