Responsible Research Practice Norma RA Romm, 2018-04-21 This book explores ways in which creative research practice can be explicitly and mindfully geared to make a difference to the quality of social and ecological existence. It offers a range of examples of how different research methods can be employed and re-tuned with this intention. The book suggests that what Romm names active research involves using the research space responsibly to open up new avenues for thinking and acting on the part of those involved in the inquiry and wider stakeholders. The book includes a discussion of a range of epistemological, ontological, methodological and axiological positions or paradigms that can be embraced by inquirers implicitly or explicitly. It details the contours of an epistemology where knowing is recognized to be grounded in social relations as a matter of ethics. While focusing on discussing the transformative paradigm and attendant view of research ethics, it considers to what extent the borders between paradigms can be treated as being permeable in creative and active inquiries. Apart from considering options for enhancing responsible research practice during the process of inquiry and reconsidering mixed research designs, the book also considers options for responsible theorizing that is inspirational for pursuing goals of social and ecological justice.

Pain Medicine and Management Mark S. Wallace, Peter Staats, 2004-03-05 A quick reference to the management of pain for specialists as well as general medical practitioners and residents. Written in a concise bulleted format, the content is limited to only the essential facts necessary for assessment and treatment of common pain conditions and presentations. A perfect review tool for both the anesthesia and pain medicine board exams.

*Accountability in Social Research* Norma Romm, 2007-05-08 In this book I have concentrated on drawing attention to various conceptions of accountability that might be brought to bear in judging the practice of social research. Much of the book is organized around making explicit the assumptions that influence what counts as proper research in society, including assumptions about how social inquirers might be held accountable. My focus is on reviewing discourses around the practice of professional inquiry with a view to reconsidering the way in which people create expectations for accountable social inquiry. My focus hereon is related to my concern that the manner in which judgments about researchers' accountability are made is not without social consequences for our way of living in society. I have approached the issues by beginning with a discussion of tenets of the position called positivism, so named by certain proponents, and by considering the view on accountability that is implied by adherence to these tenets. Briefly expressed, positivist argumentation suggests that researchers are required to do science in a manner that warrants their being considered indeed scientists. I use my discussion of accountability as seen within positivist argumentation to explicate ways in which alternative positions have arisen as ways of treating accountability issues. Through my way of comparing the various positions, I hope to provide some indication of the complexity of ethical and accountability issues in social inquiry.

National Assembly,2001      Claiming Identity Through Redefined Teaching in Construction Programs Mostafa, Sherif,Rahnamayiezekavat, Payam,2019-07-31 Without a rich learning source that presents state of the art pedagogy covering the key areas of contemporary practice the industrial field may fall out of line with the current times By reforming itself to embrace new norms such as social responsibility deploying modern construction methods including modular building and modernizing construction contracts the recent literary material will only positively influence the workforce of the world Claiming Identity Through Redefined Teaching in Construction Programs provides scholarly insights into the learning and teaching mechanisms developed at different institutions to address the ever changing attributes in the field of construction management Featuring topics that include artificial intelligence industrial law and operations management the book is ideal for educators industrial managers academics researchers and students      Daniel - a South African Chronicle Daniel van der Merwe,2015-02-17 Despite being written mainly in the third person this book enables the perceptive reader to study a dramatic part of South Africas history through the experiences of the main protagonist Because of his legal background Daniel is able to see how an initially fair legal system is corrupted in order to serve the increasingly desperate needs of the White minority This is a mere backdrop however to a love story that grows closer to tragedy as time passes because the heroine is an alcoholic The arrival of the computer alters the career of the hero dramatically and sends him on some overseas adventures to learn more about the legal implications of the new machine As a leader of a missionary team to Malawi Daniel also gets to grips with people with a totally different background and a differing worldview The book is sensitive to background and atmosphere and the hero encapsulates some of this in a few poems that form part of the main text Jealousy that green eyed monster also rears its head occasionally and further complicates relationships      **Corrupted** Jonathan D Jansen,2023-02 Through investigatory reports and interviews Jonathan Jansen reveals the structural conditions for chronic dysfunction in a sample of South African universities He reveals the political economy at work and the intense competition for resources on campuses He also provides interventions for these fragile institutions Why do some universities seem to be in a constant state of turmoil and dysfunction Jonathan Jansen explores the root causes of chronic instability in a sample of South African universities Through scrutiny of investigatory reports and interviews with more than 100 university managers and government officials Jansen finds that at the heart of the dysfunction in universities is an intense and sometimes deadly competition for resources especially on campuses located in impoverished communities It is not the lack of institutional resources but their concentration in a university that draws a mix of corrupt actors from local politicians and taxi operators to members of council and management into a never ending run on the material such as money for infrastructure and symbolic namely graduation certificates for sale assets of these institutions Jansen argues that the problem won t be solved through investments in capacity building alone because the combination of institutional capacity and institutional integrity

contributes to serial instability in universities Jansen makes an important intervention to understanding the root causes and offers interventions to produce stabilities such as the depoliticisation of university councils and appointing academics of integrity and capacity in the management and leadership of these fragile institutions This groundbreaking and long overdue study will offer a promising way forward for universities to better serve their communities and the country more broadly
