Automotive Painting Technology Kimio Toda, Abraham Salazar, Kozo Saito, 2012-12-21 This book offers unique and valuable contributions to the field It offers breadth and inclusiveness Most existing works on automotive painting cover only a single aspect of this complex topic such as the chemistry of paint or paint booth technology Monozukuri and Hitozukuri are Japanese terms that can be translated as making things and developing people but their implications in Japanese are richer and more complex than this minimal translation would indicate The Monozukuri Hitozukuri perspective is drawn from essential principles on which the Toyota approach to problem solving and continuous improvement is based From this perspective neither painting technology R D nor painting technology use in manufacturing can be done successfully without integrating technological and human concerns involved with making and learning in the broadest sense as the hyphen is meant to indicate The editors provide case studies and examples drawn from Mr Toda s 33 years of experience with automotive painting at Toyota and from Dr Saito s 18 years experience with IR4TD the research for development group he leads at the University of Kentucky that give details on how these two principles can be integrated for successful problem solving and innovation in industry in university R D and in the collaboration between the two The book will bring readers up to date on progress in the field over the last decade to provide a basis for and to indicate fruitful directions in future R D and technology innovation for automotive painting
