Sociology Anthony Giddens,Simon Griffiths,2006 This updated edition provides an ideal teaching text for first year university and college courses **The Deliverance of God** Douglas A. Campbell,2009-08-07 This book breaks a significant impasse in much Pauline interpretation pushing beyond both Lutheran and New perspectives on Paul to a non contractual apocalyptic reading of many of the apostle s most famous and most troublesome texts His strongly antithetical vision identifies participation in Christ as the sole core of Pauline theology and produces the most radical rereading of Romans 1 4 for more than a generation Even those who disagree will be forced to clarify their views as never before **Sociology** John J. Macionis,Kenneth Plummer,2008 This textbook provides a survey of sociology As the scientific study of society sociology is a social science which uses various methods of empirical investigation and critical analysis to develop a body of knowledge about human social activity It focuses on the influence of our relationships around us and how they affect our behaviors and attitudes The author approaches this subject with a desire to help students find and use sociology in everyday life

Security, Identity and Interests Bill McSweeney,1999-11-04 Bill McSweeney addresses the central problem of international relations security and constructs a novel framework for its analysis He argues for the unity of the interpersonal societal and international levels of human behaviour and outlines a concept of security which more adequately reflects the complexity and ambiguity of the topic This book introduces an alternative way of theorizing the international order within which the idea of security takes on a broader range of meaning inviting a more critical and interpretative approach to understanding the concept and formulating security policy The recent shift to sociology in international relations theory has not as yet realized its critical potential for the study of security Drawing on contemporary trends in social theory Dr McSweeney argues that human agency and moral choice are inherent features of the construction of the social and thus international order and hence of our conception of security and security policy **Multiplying Mighty Davids?** Sarah Debor,2018-05-30 This book systematically describes and evaluates the impact of energy cooperatives as a key driving force in the German energy transition toward a sustainability oriented energy sector Based on a comprehensive survey and three case studies it provides an instructive overview of the overall dimensions and scope of energy cooperatives in Germany and of their history structure and current investment projects The book not only contributes to the energy policy discourse in Germany but also highlights the role of energy cooperatives to enable an international readership to explore their potential in other countries Further it makes a theoretical contribution toward substantially supplementing actor research in general and enterprise research in particular in the field of sustainability transitions science **2025-26 NTA UGC-NET/JRF Political Science Solved Papers** YCT Expert Team , 2025 26 NTA UGC NET JRF Political Science Solved Papers 544 1095 E This book contains the previous year solved papers from 2012 to 2024 *International Law's Invisible Frames* Andrea Bianchi,Moshe Hirsch,2021 This innovative edited collection uncovers the invisible frames which form our understanding of

international law Taking an interdisciplinary approach it investigates how social cognition and knowledge production processes affect decision making and inform unquestioned beliefs about what international law is and how it works
