Meadows, Jiun-Chuan

Lin,2016-06-17 This book deals with the relationship between geomorphology and society This topic has had rather scant treatment in the literature except to some extent under the label applied geomorphology In this text the authors aim to bring

together conceptual issues and case studies of how geomorphology influences society and indeed how society is in turn influenced by geomorphology In an age in which the influence of human activities on global environments has become so paramount that it is increasingly common to refer to it geologically as the anthropocene the book aims to reflect on the geomorphological significance of widespread and diverse forms of human impact in a range of environmental settings **A Stratigraphical Basis for the Anthropocene** C.N. Waters,J.A. Zalasiewicz,M. Williams,M.A. Ellis,A.M. Snelling ,2014-06-05 Humankind has pervasively influenced the Earth s atmosphere biosphere geosphere hydrosphere and cryosphere arguably to the point of fashioning a new geological epoch the Anthropocene To constrain the Anthropocene as a potential formal unit within the Geological Time Scale a spectrum of indicators of anthropogenically induced environmental change is considered and shown as stratigraphical signals that may be used to characterize an Anthropocene unit and to recognize its base This volume describes a range of evidence that may help to define this potential new time unit and details key signatures that could be used in its definition These signatures include lithostratigraphical novel deposits minerals and mineral magnetism biostratigraphical macro and micro palaeontological successions and human induced trace fossils and chemostratigraphical organic inorganic and radiogenic signatures in deposits speleothems and ice and volcanic eruptions We include finally the suggestion that humans have created a further sphere the technosphere that drives global change
