rapidly as a subdiscipline in its own right. There emerged a keener appreciation of both the history of the discipline and the histories of those studied. Archaeologists witnessed a resurgence of interest in the concept of culture. The American Anthropologist also made systematic efforts to represent the field as a whole with biological anthropology and linguistics particularly adept at crossing subdiscipline boundaries. Proliferation of specialized areas within sociocultural anthropology encouraged work across the subdisciplines. The thirty selections in this volume reflect the notable trends and accomplishments in American anthropology during the closing decades of the millennium. An introduction by Regna Darnell offers a historical background and critical context that enable readers to better understand the changes and continuity in American anthropology during this time.
