ference is to facilitate interaction between researchers interested in the design and implementation of logic based programming languages and database systems and researchers who work in the areas of knowledge representation and nonmonotonic reasoning LPNMR strives to encompass theoretical and experimental studies that have led or will lead to the construction of practical systems for declarative programming and knowledge representation The special theme of LPNMR 2009 was Applications of Logic Programming and Nonmonotonic Reasoning in general and Answer Set Programming ASP in particular LPNMR 2009 aimed at providing a comprehensive survey of the state of the art of ASP LPNMR applications The special theme was reflected by dedicating an entire day of the conference to applications Apart from special sessions devoted to original and significant ASP LPNMR applications we solicited contributions providing an overview of existing successful applications of ASP LPNMR systems The presentations on applications were accompanied by two panels one on existing and another on future applications of ASP LPNMR

Measuring More Than Money Rafael Muñoz de Bustillo, Enrique Fernández-Macías, José-Ignacio Antón, Fernando Esteve, 2011 This highly readable and authoritative book on the social economics of job quality comes at a critical time as policy makers employers and unions seek to rebuild jobs after the economic crisis The team of authors are leading experts on European employment trends and policy and have produced an excellent study that proposes a new index of job quality for Europe Given its depth and breadth of coverage of theory and already existing indicators the book is likely to be a landmark study Readers will enjoy the engaging review of past and present works of classical political economy and behavioural economics and will benefit from the expert critical appraisal of more than 20 existing proposals for job quality indices Most importantly the authors design and test a new European Job Quality Index that provides a reliable and coherent measure of five critical dimensions of the character of contemporary jobs

Measuring More than Money is a much needed analysis that will interest both specialists and anyone concerned about job quality The proposed indicator deserves to be adopted and will enable policy makers to make good their commitment to sustainability and equality across Europe by monitoring and responding to a good job quality measure Damian Grimshaw University of Manchester UK

Is a job a job If you looked at unemployment data you would think so But economists since Adam Smith know that jobs differ in quality difficulty or pleasure of doing it Thus they tend to assume that market would equalize wage per unit of difficulty of a job and that they do not need to worry about intrinsic job quality Rafael de Bustillo shows that this is wrong and that in an era of plenty for many although not for all the challenge is to create high quality jobs and to find ways of comparing them in terms of fulfillment afforded to workers The book thus addresses a new and growing field of study for it certainly matters if we are happy or unhappy in an activity that takes almost one third of our lives and often defines who we are Branko Milanovic World Bank and University of Maryland US This is a book every labour economist or sociologist interested in job quality should read It provides a well written overview of the depth and breadth of this field presenting a systematic review of this complex multidimensional concept and discussing more than twenty of the indicators

currently in use The volume goes beyond the current literature by developing a sound empirically tested Job Quality Index for the European Union It was definitely a pleasure reading this volume Kea Tijdens University of Amsterdam The Netherlands

Mainstream economics traditionally restricts the analysis of the labour market to purely monetary factors such as earnings leaving aside many other characteristics that might affect the desirability of certain jobs By contrast this unique volume explores the alternatives and problems faced by researchers in quantifying and measuring a broader notion of job quality The contributors expertly explore the different approaches to measurement and analyze both the advantages and disadvantages of the various methods within a European context Job quality is a crucial link between the economy and well being This original book proves that it can and should be measured proposing a theoretically based multidimensional Index of Job Quality that is tested in the EU member States The index proves particularly useful to measure the differences in job quality by country occupation gender and age Based on solid theory and data this book will prove essential for postgraduate students researchers and academics of labour economics sociology industrial relations and European studies as it presents a coherent discussion of the concept and components of job quality and of the difficulties of measuring it The book also proposes a new aggregate index of job quality that can contribute to the evaluation of European employ
