Answers The Bridging The Gap:

Bridging the Gap Mansi M. Kasliwal, 2012 For centuries we have known that our dynamic universe is adorned by cosmic fireworks energetic and ephemeral beacons of light from a single star that are a million nova to a billion supernova times brighter than our sun However it had been an age old conundrum that the brightest nova is approximately 1000 times fainter than the faintest supernova why should nature leave such a wide gap In search of an answer I undertook three systematic surveys for my thesis Since I was looking for transients fainter faster and rarer than supernovae I focused my search on galaxies in the local universe We now have convincing evidence of multiple distinct populations of rare transients bridging this gap Perhaps we are witnessing new stellar physics shell detonations in ultra compact white dwarf binaries electron capture supernovae white dwarfs collapsing into neutron stars and birth of black holes A small number of intensively followed up discoveries of elusive transients sets the stage for population studies with the upcoming Large Synoptic Survey Telescope This effort works towards building a complete inventory of transients in the local universe d

Bridging the Gaps Thomas Quartier, 2007 Funeral rites help people to cope with their loss and express their religious needs Even in a secularised society such as that in the Netherlands large groups of people still fall back on ecclesiastic rites when a loved one dies But how does one explain that there are more people participating in church funerals than people who assign religion a focal place in their lives How do present day funeral goers regard the rites in which they participate Does the rite actually help them to bridge the gaps left by the deceased This study considers such questions from the angle of ritual and liturgical studies by way of empirical research into perceptions of present day church funerals in the Netherlands
