Understanding National Research Council, Division of Behavioral and Social Sciences and Education, Center for Education, Committee on Programs for Advanced Study of Mathematics and Science in American High Schools, 2002-09-06
This book takes a fresh look at programs for advanced studies for high school students in the United States with a particular focus on the Advanced Placement and the International Baccalaureate programs and asks how advanced studies can be significantly improved in general. It also examines two of the core issues surrounding these programs: they can have a profound impact on other components of the education system and participation in the programs has become key to admission at selective institutions of higher education. By looking at what could enhance the quality of high school advanced study programs as well as what precedes and comes after these programs, this report provides teachers, parents, curriculum developers, administrators, college science and mathematics faculty, and the educational research community with a detailed assessment that can be used to guide change within advanced study programs. **The College Board Review**, 2003

Report of the Secretary of the Senate United States. Congress. Senate, 1999 **Modern Curriculum for Gifted and Advanced Academic Students** Todd A. Kettler, 2021-09-03
Modern Curriculum for Gifted and Advanced Academic Students addresses the need for advanced curriculum design in an age of national standards and 21st century learning innovations. The text and its authors work from the assumption that the most advanced learners need a qualitatively different design of learning experiences in order to develop their potential into outstanding achievement, answering the question: How should we design learning experiences for our most advanced academic students in the foundational curriculum areas? This book provides the most contemporary thinking about how to design in depth courses of study in the foundational curriculum areas with a high degree of complexity and advanced content. The book includes chapters articulating specific design components like creative thinking, critical thinking, and authentic research, but also subject-specific chapters in mathematics, language arts, science, and social studies to demonstrate application of those design components. **College Counseling for Admissions Professionals** Nathan J.
