

A level Geography Paper 1 - Coastal systems and landscapes (Questions and Answers A+ Graded 100% Verified)

What is a system? **ANSWER:** A set of interrelated components working together towards some kind of process.

What is an open system? **ANSWER:** Where matter and energy can be transferred from the system across and beyond the boundary into the surrounding environment.

What is a closed system? **ANSWER:** These have transfers of energy both into and beyond the system boundary but not transfer of matter

What is an isolated system? **ANSWER:** No interactions with anything outside the system boundary. No input or output of energy or matter

What is dynamic equilibrium? **ANSWER:** The balanced state of a system when it's inputs and outputs are equal. If one element changes because of an external influence, this affects the internal equilibrium and affects other components of the system. By a process of feedback, the system adjusts to the change and regains equilibrium.

What is positive feedback? **ANSWER:** Where the effects of an action are amplified or multiplied by subsequent or secondary knock-on effects.

What is negative feedback? **ANSWER:** Where the effects of an action are nullified by its subsequent knock-on effects.

What are the four coastal zones; explain each. **ANSWER:** -Backshore: Area between high water mark (HWM) and the landward limit of marine activity. Changes normally take place here only during storm activity.

-Foreshore: Area lying between HWM and the low watermark (LWM). Most important to marine processes in times that are not influenced by the storm.

-Inshore: Area between LWM and the point where the waves cease to have any influence on the land beneath.

-Offshore: Area beyond the point where waves cease to impact upon the seabed and in which activity is limited to depositions of sediments

Give the inputs, components and outputs in a coastal environment. **ANSWER:** Inputs:

- Energy from wind, waves, tides & sea currents
- Sediment from rivers, cliff erosion, wind, LSD
- Geology of the coastline
- Sea level change
