

Chapter 5: Biological Diversity and Conservation

Biodiversity

- The variety of species in a specific area
- Measured by the number of different species that live in a certain area

Why is biodiversity important?

- Living things depend on other living things
 - Animals depend on plants and plants depend on animals to live
- Different populations of organisms have adapted to living together
 - Predators and prey: organisms involved in symbiosis
- Brings stability to an ecosystem
 - Since one species of plant is spread out between other types of plants and animals, it is difficult to wipe out that species completely
- Humans depend on other organisms for their needs
 - Plants provide oxygen, animals and plants provide food
 - Plants provide raw materials for clothes and buildings
 - Plants, fungi and bacteria provide medications

Answers For Biological Diversity And Conservation:

Biodiversity Monitoring and Conservation Ben Collen, Nathalie Pettorelli, Jonathan E. M. Baillie, Sarah M.

Durant, 2013-05-06 As the impacts of anthropogenic activities increase in both magnitude and extent biodiversity is coming under increasing pressure Scientists and policy makers are frequently hampered by a lack of information on biological systems particularly information relating to long term trends Such information is crucial to developing an understanding as to how biodiversity may respond to global environmental change Knowledge gaps make it very difficult to develop effective policies and legislation to reduce and reverse biodiversity loss This book explores the gap between global commitments to biodiversity conservation and local action to track biodiversity change and implement conservation action High profile international political commitments to improve biodiversity conservation such as the targets set by the Convention on Biological Diversity require innovative and rapid responses from both science and policy This multi disciplinary perspective highlights barriers to conservation and offers novel solutions to evaluating trends in biodiversity at multiple scales
