Disney and US Imperialism

Cultural Imperialism

Imperialism can be defined as the guiding principle of broadening a nation's power by the acquiring of other countries, or by the formation of financial and political authority over other nations.

Cultural

imperialism can then be defined as the cultural impact of imperialism. This can mean many different things, as culture is such a broad term. When looking at popular culture and cultural imperialism, it is important to look again at the concept of dominant culture. The dominant culture is created, controlled, and spread by the ruling class. The ruling class refers to those individuals or corporations with the most economic power and cultural influence. The political actions of a nation, or the values and beliefs of a society, could be examples of cultural elements that are affected by cultural imperialism, and that is what is being referred to in this lecture.

The Commodification of American Culture

The global power of American culture has been in full effect since the 19th century, when distinctly American commodities were exchanged with other nations on an increasingly large scale. These consumer products ended up being sold in countries such as Britain, or other Western European countries, and this helped to spread dominant American culture. With the advent of mass media, particularly radio and television broadcasting, American consumerist culture was further circulated throughout the world. American cultural commodities, such as films, cars, fast food, music, etc., have increased American influence on an international scale. In turn, some of the commodities produced by the United States since the 1950's have arguably become symbolic of American culture. Coca-cola
