Lester R.G. Cannon

14 June Biology Paper 2 Zimsec:

Resources in Education ,1989 *The Zimbabwe Science News* ,1995 *Current Catalog* National Library of Medicine (U.S.),1993 First multi year cumulation covers six years 1965 70 **The biology of Latimeria chalumnae and evolution of coelacanth** J.A. Musick,Michael N. Bruton,E.K. Balon,2012-12-06 **Antimicrobial Resistance in Aquatic Environments** William Calero-Cáceres,Jorge Andres Olivares Pacheco,Lorena Rodriguez-Rubio,Elisabet Marti,2022-03-15

Biology of Turbellaria and some Related Flatworms Lester R.G. Cannon,2012-12-06 Turbellaria the mainly free living flatworms and some of their parasitic relatives are among the simplest of the metazoa and as such provide ideal models for a wide range of fundamental studies The 60 contributions to Biology of Turbellaria and some Related Flatworms cover taxonomy and phylogeny biogeography and genetics ecology and behaviour Anatomy and ultrastructure development and regeneration genes and sequences and neurophysiology Biology of Turbellaria and some Related Flatworms is the most recent compilation in the series published in Hydrobiologia since 1981 covering research on these flatworms assembled by the world s leading authorities on the group Audience These papers present the advanced student and serious researcher with up to date information on an important but often neglected group whose place in the animal kingdom demands greater attention **Agricultural Development in SADCC Countries: Zimbabwe** ,1989 The African Mother Tongue and Mathematical Ideas Abdul Karim Bangura,2020-06-02 This book by renowned scholar Dr Abdul Karim Bangura combines linguistics and mathematics to show how and why African centred mathematical ideas can be a driving force in Africa s development efforts Bangura explores the concept that Africa has been the centre of the History of Mathematics for thousands of years as the civilizations that emerged across the continent developed contributions which would enrich both ancient and modern understanding of nature through mathematics However scholars and other professionals working in the field of mathematics education in Africa have identified a plethora of issues in carrying out their tasks This is highlighted by one of the most compelling arguments in the book which is that a major reason for these problems is the fact that the African mother tongues has been greatly neglected in the teaching of mathematics in the continent Bangura asserts that a change has to be made in order for Africa to benefit from the exceptional opportunities mathematics offer showing that even if there is a great body of work connecting linguistics and mathematics few analyses have been performed on the link between African languages and mathematics and the ones that have been made are not theoretically grounded on linguistics Thus the book begins by identifying the objects of study of linguistics and mathematics and delineates which ones they have in common Next since the object of study of linguistics is language the nine design features of language are employed to examine each of the objects as it pertains to African languages After that mathematical ideas of sustainability and those of tipping points are suggested as means to help Africa s development efforts **The Community Forests of Mexico** David Barton Bray,Leticia Merino-Pérez,Deborah Barry,2009-03-16 Mexico leads the world in community management of forests for

the commercial production of timber Yet this success story is not widely known even in Mexico despite the fact that communities around the globe are increasingly involved in managing their own forest resources To assess the achievements and shortcomings of Mexico's community forest management programs and to offer approaches that can be applied in other parts of the world this book collects fourteen articles that explore community forest management from historical policy economic ecological sociological and political perspectives The contributors to this book are established researchers in the field as well as many of the important actors in Mexico's nongovernmental organization sector Some articles are case studies of community forest management programs in the states of Michoacán Oaxaca Durango Quintana Roo and Guerrero Others provide broader historical and contemporary overviews of various aspects of community forest management As a whole this volume clearly establishes that the community forest sector in Mexico is large diverse and has achieved unusual maturity in doing what communities in the rest of the world are only beginning to explore how to balance community income with forest conservation In this process Mexican communities are also managing for sustainable landscapes and livelihoods

HIV and Breastfeeding Pamela Morrison, 2022-02-24 In the early 1980s it was discovered that HIV the virus that causes AIDS could be passed through a mother's milk to her baby Almost overnight in the industrialised countries and later in the African countries most ravaged by HIV breastfeeding became an endangered practice But in the rush to reduce transmission of HIV everything we already knew about breastfeeding's life saving effects was overlooked with devastating consequences for mothers and babies In *HIV and Breastfeeding* the untold story former IBCLC Pamela Morrison an acknowledged authority on HIV and breastfeeding reveals how women in the world's most poverty stricken areas were persuaded to abandon breastfeeding as part of a short sighted and deadly policy that led to a humanitarian disaster The dilemma that breastfeeding an act of nurturing which confers food comfort and love could be at once life saving yet lethal has been called the ultimate paradox This critical account reveals how vital breastfeeding is even in the most difficult of circumstances and examines the lessons that can be learned from the mistakes of the past which is particularly relevant as we deal with the consequences for mothers and babies of another global pandemic Covid 19 With detailed information for HIV positive mothers and their caregivers and success stories from mothers themselves this book is essential reading for anyone involved in protecting and supporting breastfeeding or with a need for evidence based information about breastfeeding and HIV

Drawing for Science Education Phyllis Katz, 2017-03-23 This book argues for the essential use of drawing as a tool for science teaching and learning The authors are working in schools universities and continual science learning CSL settings around the world They have written of their experiences using a variety of prompts to encourage people to take pen to paper and draw their thinking sometimes direct observation and in other instances their memories The result is a collection of research and essays that offer theory techniques outcomes and models for the reader Young children have provided evidence of the perceptions that they have accumulated from families and the media before they reach classrooms Secondary students describe their ideas of chemistry

and physics Teacher educators use drawings to consider the progress of their undergraduates understanding of science teaching and even their moral ethical responses to teaching about climate change Museum visitors have drawn their understanding of the physics of how exhibit sounds are transmitted A physician explains how the history of drawing has been a critical tool to medical education and doctor patient communications Each chapter contains samples insights and where applicable analysis techniques The chapters in this book should be helpful to researchers and teachers alike across the teaching and learning continuum The sections are divided by the kinds of activities for which drawing has historically been used in science education An instance of observation Audubon Linnaeus A process how plants grow over time what happens when chemicals combine Conceptions of what science is and who does it Images of identity development in science teaching and learning

Overheated Andrew T. Guzman, 2013-05 The theory that human activity is causing the earth to warm is broadly known Yet while the vast majority of scientists who study the issue think that global warming is both real and dangerous nations have done very little to halt much less reverse the process The main reason for this is that crafting policies to reduce global warming presents a serious collective action problem the threat today seems minor yet taking it on alone puts nations at a competitive disadvantage with those who simply elide the issue Moreover amidst this environment of buck passing there is a vocal minority that contends that global warming is not even occurring And there are others who admit that while it might be occurring it is an entirely manageable threat In *Overheated* Andrew Guzman stresses that a major problem facing proponents of global warming reduction policies is that it remains an abstract issue for most Yes it might occur but ordinary people really do not have a sense of how it will impact their lives Guzman moves beyond abstractions and spells out the real world consequences for human societies if we continue on the path that we re presently on pandemics resulting from escalating urbanization and migration massive flooding the impact of rising sea levels on coastlines and oscillations in food production Guzman argues that only by establishing the increasing likelihood of these sorts of catastrophes can we begin to implement changes in national and international policy By shifting the discussion away from scientific evidence that has no apparent effect on people s daily lives to global warming s wide ranging impact on human societies *Overheated* brings global warming down to earth In doing so it forces us to confront the very real ways in which climate change will negatively transform the lives of billions of people if we fail to institute effective policies to mitigate it

Plant Conservation Biotechnology Dr Erica Benson, Erica Benson, 2002-04-12 Introduces biotechnological techniques which are currently used to conserve horticultural and crop plant germplasm forest tree genetic resources endangered plant species and plant cell culture collections Covers techniques and applications *Senate Report No. 105-36, 105-1*, 1997
