14 November Math Memo:

Planning the Development of Builders, Leaders and Managers for 21st-Century Business: Curriculum Review at Columbia Business School

N. Capon, 2012-12-06 Business and management education has an important impact on business practice throughout the world To a very large extent possession of the MBA degree is a passport into the upper reaches of management and CEOs of many major corporations have earned an MBA It is a reasonable inference that the education received by these leaders and managers during their MBA experience has an important impact on the way that businesses throughout the world are led and managed and that major corporate decisions are made The heart of the MBA education is the curriculum and curriculum design is perhaps the most important strategic function for a business school faculty to undertake In order to understand the many issues concerning this contemporary curriculum review this book examines three related contextual domains First it details the long term growth of business and management education Second it examines the major theoretical and empirical literatures on organizational evolution and decision making paying special attention to decision making in institutions of higher education Finally the book describes the previous major curriculum review at Columbia Business School in the late 1950s and the subsequent changes that formed the curriculum that was changed in 1992 This book demonstrates what can be achieved by an institution that sets high standards for its business education and assists faculty and administrators in other schools of business and management as they contemplate revision of their curricula In addition it provides a prime example of curriculum design effort in one of the leading institutions worldwide Finally it will be of interest to scholars in several different fields notably higher education curriculum review organizational decision making and long run organizational evolution

Pedagogy and Place Robert A. M. Stern, Jimmy Stamp, 2016-01-01 Marking the centennial of the 1916 establishment of a professional program Pedagogy and Place is the definitive text on the history of the Yale School of Architecture Robert A M Stern current dean of the school and Jimmy Stamp examine its growth and change over the years and they trace the impact of those who taught or studied there as well as the architecturally significant buildings that housed the program on the evolution of architecture education at Yale Owing to the impressive number of notable practitioners who have attended or been affiliated with the school this book also contributes a history beyond Yale of the architecture profession in the twentieth century Featuring extensive archival research and illuminating firsthand accounts from alumni faculty and administrators this well rounded and engaging narrative is richly illustrated with historic photos of the school and its studios images of student work and important architectural achievements on and off campus **National Library of Medicine Current**

Catalog National Library of Medicine (U.S.), 1970 **Grace Hopper** Kathleen Broome Williams, 2013-01-15 When Grace Hopper retired as a rear admiral from the U S Navy in 1986 she was the first woman restricted line officer to reach flag rank and at the age of seventy nine the oldest serving officer in the Navy A mathematician by training who became a computer scientist the eccentric and outspoken Hopper helped propel the Navy into the computer age She also was a superb publicist for the Navy appearing frequently on radio and television and quoted regularly in newspapers and magazines Yet in spite of all the attention she received until now Amazing Grace as she was called has never been the subject of a full biography Kathleen Broome Williams looks at Hopper s entire naval career from the time she joined the WAVES and was sent in 1943 to work on the Mark I computer at Harvard where she became one of the country s first computer programmers Thanks to this early Navy introduction to computing the author explains Hopper had a distinguished civilian career in commercial

computing after the war gaining fame for her part in the creation of COBOL The admiral s Navy days were far from over however and Williams tells how Hopper already past retirement age was recalled to active duty at the Pentagon in 1967 to standardize computer programming languages for Navy computers Her temporary appointment lasted for nineteen years while she standardized COBOL for the entire department of defense Based on extensive interviews with colleagues and family and on archival material never before examined this biography not only illuminates Hopper s pioneering accomplishments in a field that came to be dominated by men but provides a fascinating overview of computing from its beginnings in World War II to the late 1980s Memorandum Rand Corporation, Operations Research (unclassified Title) Defense Documentation Center (U.S.),1962 **Title Announcement Bulletin** ,1957
