Maher,Mary Kay Thompson Tetreault,2013-10-18 Over the past several decades higher education has been transformed by the entry of faculty of color and women into the university system Through detailed institutional ethnographies of three very different universities *Privilege and Diversity in the Academy* explores how this diversification has dismantled and reconfigured relationships of privilege and diversity in higher education Authors Maher and Tetreault use examples from a top ranked private university a comprehensive urban university and a major public university to illustrate how privilege is enacted resisted and transformed as changes occur in the student bodies and faculties of these schools In their analyses they identify the institutional structures that facilitate the success of a diverse faculty and make valuable observations about patterns of institutional change and resistance *Bulletin* ,1944 **Bibliography of North American Geology, 1929-1939** Emma Mertins Thom,1944 **Bibliography of North American Geology** ,1944 1919 28 cumulation includes material previously issued in the 1919 20 1935 36 issues and also material not published separately for 1927 28 1929 39 cumulation includes material previously issued in the 1929 30 1935 36 issues and also material for 1937 39 not published separately *In the Name of Eugenics* Daniel J. Tax Court,1986 *Palmer's Index to "The Times" Newspaper* ,1872 Covers the period from 1790 to 1905 in The Times of London *From Medical Chemistry to Biochemistry* Robert E. Kohler,1982-05-31 This penetrating case study of institution building and entrepreneurship in science shows how a minor medical speciality evolved into a large and powerful academic discipline Drawing extensively on little used archival sources the author analyses in detail how biomedical science became a central part of medical training and practice The book shows how biochemistry was defined as a distinct discipline by the programmatic vision of individual biochemists and of patrons and competitors in related disciplines It shows how discipline builders used research programmes as strategies that they adapted to the opportunities offered by changing educational markets and national medical reform movements in the United States Britain and Germany The author argues that the priorities and styles of various departments and schools of biochemistry reflect systematic social relationships between that discipline and biology chemistry and medicine Science is shaped by its service roles in particular local contexts This is the central theme The author s view of the political economy of modern science will be of interest to
