Conflict and Catholic Social Ethics Taylor J. Ott,2024-11-01 This book focuses on the question of

how to understand conflict and its place in Catholic and Christian social ethics The author examines Catholic social teaching CST for its explicit mentions of conflict or contention and analyzes the way that CST addresses the subjects of peace labor and environment While CST offers precedent to think about conflict within the frame of Catholic ethics its lack of explicit engagement remains a major obstacle to a full rich and concrete understanding of the fabric of society and the work of social justice Any social ethic that is not informed by the presence of conflict misses a major dynamic in society and therefore leads to ethical judgements that are at best inadequate and at worst actively harmful Building upon the insight of respected

thinkers within Catholic social thought this study is based on an interdisciplinary method that engages sociology political theory postcolonial theory and intersectional feminist ethics The book will be of particular interest to theological ethicists and those who work with modern CST The Principle of Sustainability Klaus Bosselmann,2016-12-08 This book investigates how sustainability informs key principles and concepts of domestic and international law It calls for the recognition of ecological sustainability as a fundamental principle to guide the entire legal system rather than just environmental legislation To this end the book makes a contribution to global environmental constitutionalism a rapidly growing area within comparative and international environmental law and constitutional law This 2nd edition has been fully revised and updated to take account of recent developments and new case law The book will be a valuable resource for students researchers and policy makers working in the areas of environmental law and governance **Informal Workers**
