Ownership and Governance of Companies Jonathan Michie, Vishnu Padayachee, 2021-06-29 Apartheid South Africa was often thought to run in the interests of the business elite Yet 27 years after apartheid those business interests remain largely entrenched Why Did the South African business community play a role in engineering this outcome perhaps recognising the apartheid era was over and jumping ship in time Conversely the mission of the ANC was widely perceived to be to shift wealth and power into the hands of the whole community Yet despite black empowerment measures corporate ownership remains largely in white hands and certainly in the hands of an elite few even though no longer restricted to whites This picture is replicated across the global south where corporate ownership tends to be concentrated in the hands of an elite rather than being more democratically spread Why have alternative corporate forms not been pursued more vigorously with ownership in the hands of customers employees and local communities In the case of South Africa where the majority of customers and employees are black this could have delivered on the ANC s mission to replace the apartheid era with a democratic one in terms of wealth incomes and power as well as in terms of voting and civic rights This edited volume explores all these questions and looks at ways to align corporate forms with economic and social goals The chapters in this book were originally published as special issues of International Review of Applied Economics

Drought Policies: Case Studies on Mega-droughts for the High Level Experts and Leaders Panel on Water and Disasters (HELP) Jerome Delli Prisco, Kenzo Hiroki, 2019-11-15 This book focuses on mega droughts of the past 20 years Twelve cases from both developed and developing countries are elaborated in the book Its intention is to draw lessons from the cases of extremely severe water shortages so that countries and stakeholders can be better prepared for extreme drought events in the future Several recurrent themes emerge from the diverse case studies and descriptions of programs For example most chapters discuss the necessity to move from reactive compensatory to preventive policies This theme has implications for use of insurance in developing countries e g is insurance encouraging investments to help countries avoid disasters or is it acting mostly in a humanitarian way to compensate for losses to help people Several authors point to the importance of risk

assessment and to developing risk based policies for drought This raises statistical issues of how such assessments of uncertainty and risks are done and how they relate to actual occurrence of events Most chapters call for more inter sectoral policies policies which integrate water resources management approaches and to the necessity of raising public awareness of droughts in times of no drought The issue of structural versus nonstructural is clear in most cases While often cast as either or the message that emerges is more one of how do you integrate these approaches Finally a few chapters bring to light how prevention is needed for national security as well as water security In Focus a book series that showcases the latest accomplishments in water research Each book focuses on a specialist area with papers from top experts in the field It aims to be a vehicle for in depth understanding and inspire further conversations in the sector **Enterprise Information**
