Beyond Stereotypes Liwei Liu, 2023-07-14 This book investigates parental engagement in the transition to school in China and Australia which were taken as representatives of Eastern and Western cultures respectively

A positive transition to school is important for children's learning and wellbeing and parents play a critical role in it. The author therefore compares Chinese and Australian parents' perceptions of and engagement in the transition to school and the factors influencing it. By modifying the parental engagement scale and re-constructing the bioecological model of parental engagement in transition to school in the contexts of China and Australia, the book offers both instrumental and theoretical contributions in the field. The author further argues that parents are facing challenges and tensions brought on by both global trends and local contexts, which counters people's stereotypes of Chinese and Australian parents. The book will be of interest to scholars and students studying parental engagement, transition to school, and international comparative studies.

Teaching and Learning Chinese as a Foreign or Second Language: The Educational Psychology Perspective Yang Frank Gong, Chun Lai, Jinghe Han, Chan Lu, Sihui Echo Ke, 2024-02-21. Over the past two decades, Chinese as a foreign or second language (CFL/CSL) has been increasingly taught and learnt as an important language both within and outside China. Studies in the field have attempted to address deep-seated tensions between existing educational ideologies, concepts, strategies, and approaches and student learning process and performance, and between existent teaching methods and techniques and the globalization of Chinese language education.

Handbook of Automated Scoring Duanli Yan, André A. Rupp, Peter W. Foltz, 2020-02-26. Automated scoring engines require a careful balancing of the contributions of technology, NLP, psychometrics, artificial intelligence, and the learning sciences. The present handbook is evidence that the theories, methodologies, and underlying technology that surround automated scoring have reached maturity and that there is a growing acceptance of these technologies among experts and the public. From the Foreword by Alina von Davier, ACTNext Senior Vice President. *Handbook of Automated Scoring: Theory into Practice* provides a scientifically grounded overview of the key research efforts required to move automated scoring systems into operational practice. It examines the field of automated scoring from the viewpoint of related scientific fields serving as its foundation, the latest developments of computational methodologies utilized in automated scoring, and several large-scale real-world applications of automated scoring for complex learning and assessment systems. The book is organized into three parts that cover 1) theoretical foundations, 2) operational methodologies, and 3) practical illustrations, each with a commentary. In addition, the handbook includes an introduction and synthesis chapter as well as a cross-chapter glossary.
