Science Teaching in Schools Great Britain: Parliament: House of Lords: Science and Technology Committee, 2006-11-05 The Committee's report examines science and mathematics teaching in secondary schools in England focusing on the following issues the take up of science and mathematics at GCSE and A level the provision of careers advice to students problems in the recruitment and retention of teachers the quality of teaching methods and the role of continuing professional development The Committee finds that effective science teaching in schools is essential both in order to ensure a satisfactory general level of scientific literacy in society and to enable the next generation of scientists and engineers to progress into higher education and beyond

It argues that the current examination system forces students to study an excessively narrow range of subjects at too early an age and it recommends that the Government should reconsider the Tomlinson proposals for a broader diploma based system for 14-19 year old students based on the International Baccalaureate. This would ensure that students receive a more rounded education and are not made to over specialise before they are able to see the merits of studying science and mathematics. Concerns are also raised about the shortage of science teachers particularly specialist physics and chemistry teachers, the quality of careers advice in schools and the importance of practical science in schools.

Maldives Investment and Business Guide Volume 1 Strategic and Practical Information

The 1970 UNESCO and 1995 UNIDROIT Conventions on Stolen or Illegally Transferred Cultural Property, 2024-02-06
The illicit traffic in cultural objects is a grave concern to the general public and international community. The resulting cultural damage fuels debates on how best to regulate the trade in cultural objects and inform legal responses at all levels for the protection of movable cultural heritage. Treaties concerning the treatment of cultural objects during peacetime and war represent some of the earliest multilateral initiatives on cultural heritage in the modern era. They also remain some of the most deeply contested, representing shifting fault lines within the international community. Authored by leading scholars and practitioners from around the world, this Commentary is the first to cover the two leading multilateral treaties on movable cultural heritage in one volume: the Convention on the Means of Prohibiting and Preventing the Illicit Import, Export and Transfer of Ownership of Cultural Property adopted by UNESCO in 1970 and the Convention on Stolen or Illegally Exported Cultural Objects adopted by UNIDROIT in 1995. This Commentary is designed to be the authoritative text for academics, lawyers, policymakers and diplomats on the protection and regulation of cultural objects. Encompassing both public and private international law rules on the trade in cultural objects, it provides a detailed historical and thematic overview. Drawing on the travaux préparatoires and intergovernmental and state practice over the last half century, the Commentary provides an article by article analysis of the interpretation and application of these treaties. The texts of the 1970 UNESCO and 1995 UNIDROIT Conventions are examined in the working context of other culture conventions including the World Heritage Convention and the Intangible Heritage Convention as well as related fields of international law such as international humanitarian law, international criminal law, human rights law and international economic law. The volume also offers a critical examination of current trends and future directions which are informing the field.
