Our Primary Expertise Russell T. McCutcheon,2025-10-14 Our Primary Expertise A Future for the Study of Religion brings the author full circle from his first book in 1997 on how claims that religion was unique were used to establish the North America field to his present argument that its future is instead based on the degree to which its findings can be applied in a wide assortment of areas both inside and outside of academia Its previously uncollected essays all with new introductions that frame this timely argument make plain that longstanding critiques of how scholars go about their work have always been about the study of religion s odd home in the humanities a place that s increasingly vulnerable in

today's university. Calling on members of the field not just to revise their research methods but also the ways that they train the next generation. Our Primary Expertise is the only work in the field taking seriously that scholars of religion can help to secure the future of their own field if only they're prepared to see the life of the mind as a rhetoric that they can no longer afford. *The Practice of Enterprise Modeling* Ulrich Frank, Oscar Pastor, Pericles Loucopoulos, Ilias Petrounias, 2014-11-07. Deepening Democracy Joseph Tharamangalam, Jos Chathukulam, 2022-12-30. This book examines the renewed interest and commitment that countries across the world have shown in recent decades towards adopting models of decentralising or downsizing the state and moving towards more participatory models of government. It examines systems of decentralised development such as self-managing co-operatives from a global and comparative perspective with a focus on developing countries. Drawing on examples from Kerala and a few other states in India as well as Cuba, Bangladesh and South Africa among other countries, the book offers critical perspectives on the positive impacts of these experiments and the promises these offer for the future. It discusses the challenges of implementing these models, how well these work in coordination with the civil society and the state, issues of transparency and democratic oversight as well as corruption and capture of power due to entrenched structures of inequality. The volume analyses welfare and development models and self-management interventions in countering the effects of the COVID-19 pandemic. It also looks at the merits and demerits of decentralisation in countering the global socioeconomic and environmental crisis and the rise of authoritarian populism in many countries. The book will be of interest to students and researchers of development studies, political science, business community, development, social justice as well as of co-operative management programmes. It will also appeal to students of political economy as well as development professionals, think tanks and policymakers. *Educating the Top 100 Percent* Stephen G. Katsinas, Nathaniel J. Bray, Martha J. Kanter, 2022-08-23. *Educating the Top 100 Percent* assesses the decline of higher education funding and offers ambitious policy recommendations to restore the possibility of accessible, affordable education for all. Stephen G. Katsinas, Nathaniel J. Bray, and Martha J. Kanter probe the complex interplay of federal, state and local policies and illustrate how government actions have over time contributed to the long-term slide of US educational attainment. Declining federal and state funding of public higher education has forced institutions to revise their financial models, passing costs directly through to students to the detriment of prospective students and the nation. Experts in

education policy the authors point out how the unintended consequences of today's funding model deny an ever increasing portion of the population important educational and professional opportunities By providing context for how we arrived at this financial conundrum and analyzing robust quantitative data from national sources Katsinas and his colleagues offer pragmatic sustainable and stable policy options for educating all Americans The authors provide innovative ideas key lessons learned and actionable proposals to fund public higher education Their top down federal and bottom up local and state policy solutions aim to rectify plummeting high school to college continuation and college graduation rates As a result they present a vision of a brighter economic cultural and civic future for educating all Americans Educating the Top 100 Percent demonstrates how stable sustainable funding policies can scaffold a better public higher education system for all
