Neurotrauma Management for the Severely Injured Polytrauma Patient James M. Ecklund, Leon E. Moores, 2017-01-12

This text addresses many of the questions which occur when medical professionals of various disciplines interact and have different plans and interventions each with its own valid scientific and or experience based rationale Questions involving tourniquet placement ideal fluids and volumes for resuscitation VTE prophylaxis and many other management considerations Straightforward decisions in the patient with a single diagnosis often conflict when applied to the neurologically injured polytrauma patients Neurotrauma Management for the Severely Injured Polytrauma Patient answers as many of these questions as possible based on the current literature vast experience with severe neurotrauma in the current conflicts in Afghanistan and Iraq and the experience of trauma experts across the globe as well as proposes areas for future study where answers are currently less clear

Executive Function(s): Conductor, Orchestra or Symphony? Towards a Trans-Disciplinary Unification of Theory and Practice Across Development, in Normal and Atypical Groups Lynne A.

Barker, Nicholas Morton, 2018-08-30 There are several theories of executive function s that tend to share some theoretical overlap yet are also conceptually distinct each bolstered by empirical data Norman and Shallice 1986 Shallice Stuss and Alexander 2007 Burgess Gilbert Burgess Miyake et al 2000 The notion that executive processes are supervisory and most in demand in novel situations was an early conceptualization of executive function that has been adapted and refined over time Norman Shallice 2001 Burgess Gilbert ii automatic orientation towards stimuli in the environment or internally driven thought Burgess Gilbert iii the automatically generated interface between tacit processes and strategic conscious thought Barker Andrade Romanowski Morton and Wasti 2006 Morton and Barker 2010 and iv distinct but interrelated executive processes that maintain update and switch across different sources of information Miyake et al 2000 One problem is that executive dysfunction or dysexecutive syndrome Baddeley Eslinger Barker Andrade Andr s Chevignard et al 2000 Cripe 1998 Fortin Godbout Lamberts Evans Barker Morton Morrison McGuire 2011 Complete elimination of environmental confounds runs the risk of generating results that cannot be generalized beyond constrained circumstances of the test environment Barker Andrade Burgess et al 2006 Finally translational issues also confound executive function research across different disciplines psychiatry cognitive science and developmental psychology and across typically developing and clinical populations including Autism Spectrum Disorders Head Injury and Schizophrenia Blakemore Taylor Barker Heavey McHale 2013 Consequently there is a need for unification of executive function approaches across disciplines and populations and narrowing of the conceptual gap between theoretical positions clinical symptoms and measurement

Smart Cities and Machine Learning in Urban Health Thomas, J. Joshua, Geropanta, Vasiliki, Karagianni, Anna, Panchenko, Vladimir, Vasant, Pandian, 2021-11-12 The perception of smart cities encompasses a strategy that uses different types of technologies artificial intelligence AI and machine learning and in which through the internet of things IoT and sensor based data collection the

strategy extrapolates information using insights gained from that data to manage or monitor or track assets resources and services efficiently in an urban area Both these models deeply affect the localities where they are applied and can create together immense possibilities for urban recovery better quality of life physical and mental health protection and economic and social redevelopment Smart Cities and Machine Learning in Urban Health promotes interdisciplinary work that develops and illustrates the concept of resilience in relation to smart city and machine learning The book examines the ability of an area and its communities to recover quickly from difficulties the rigidness and resistance of an area and its communities to possible crisis the ability of an area its communities infrastructure and business to spring back into shape and the responsiveness and mitigation towards the crisis with a special look at the impact of the COVID 19 pandemic The research s theoretical foundation rests on a wide range of non architectural sources primarily AI sociology urban studies and technological development but it explores everything on cases taken from real cities thus transforming them into pieces of architectural interest Covering topics such as carbon emissions digital healthcare systems and urban transformation this book is an essential resource for graduate and post graduate students policymakers researchers university faculty engineers public management hospital administration professors and academicians **Life, Death, and Widowhood** Ann P

Stable predictive biomarkers and interpretable disease signatures are seen as a significant step towards personalized medicine In this perspective integration of multi omic data coming from genomics transcriptomics glycomics proteomics metabolomics is a powerful strategy to reconstruct and analyse complex multi dimensional interactions enabling deeper mechanistic and medical insight At the same time there is a rising concern that much of such different omic data although often publicly and freely available lie in databases and repositories underutilised or not used at all Issues coming from lack of standardisation and shared biological identities are also well known From these considerations a novel pressing request arises from the life sciences to design methodologies and approaches that allow for these data to be interpreted as a whole i e as intertwined molecular signatures containing genes proteins mRNAs and miRNAs able to capture inter layers connections and complexity Papers discuss data integration approaches and methods of several types and extents their application in understanding the pathogenesis of specific diseases or in identifying candidate biomarkers to exploit the full benefit of multi omic datasets and their intrinsic information content Topics of interest include but are not limited to

Methods for the integration of layered data including but not limited to genomics transcriptomics glycomics proteomics metabolomics Application of multi omic data integration approaches for diagnostic biomarker discovery in any field of the life sciences Innovative approaches for the analysis and the visualization of multi omic datasets Methods and applications for systematic measurements from single undivided samples comprising genomic transcriptomic proteomic metabolomic measurements among others Multi scale approaches for integrated dynamic modelling and simulation Implementation of
