On Unemployment Mark R. Reiff, 2015-10-07 With unemployment at historically high rates that show signs of becoming structural there is a pressing need for an in depth exploration of this economic injustice Unemployment is one of the problems most likely to put critical pressure on our political institutions disrupt the social fabric of our way of life and even threaten the continuation of liberalism itself Despite the obvious importance of the problem of unemployment however there has been a curious lack of attention paid to this issue by contemporary non Marxist political philosophers On Unemployment explores the moral implications of the problem of unemployment despite the continuing uncertainty involving both its causes and its cures Reiff takes up a series of questions about the nature of unemployment and what justice has to tell us about what we should do if anything to alleviate it The book comprehensively discusses the related theory and suggests how we might implement these more general observations in the real world It addresses the politics of unemployment and the extent to which opposition to some or all of the book's various proposals stem not from empirical disagreements about the best solutions but from more basic moral disagreements about whether the reduction of unemployment is indeed an appropriate moral goal This exciting new text will be essential for scholars and readers across business economics and finance as well as politics philosophy and sociology

Time, Communication and Global Capitalism Wayne Hope,2016-04-08 In this book Wayne Hope analyzes the double relation between time and global capitalism In order to do this he cross relates four epistemes of time epochality time reckoning temporality and coevalness with four materializations of time hegemony conflict crisis and rupture Using this framework allows Hope to argue that global capitalism is epochally distinctive riven by time conflicts prone to recurring crises and vulnerable to collective opposition These critical insights are not easily thematized in a mediated world of real time reflexivity detemporalized presentism and denials of coevalness associated with structural exclusions of the poor However the worldwide repercussions of the 2008 financial collapse and the resulting confluence of occupation movements riots protests strike activity and anti austerity activism raises the prospect of a rupture within and beyond global capitalism

The Ecosystem of Exile Politics Susan Banki,2024-11-15 The Ecosystem of Exile Politics relays the events in Bhutan that led to the exodus of one sixth of the population and then recounts the activism by Bhutan s refugee diaspora that followed in response Susan Banki asserts that activism functions like a physical ecosystem in which hubs of activism in different locations interact to pressure the home country For Bhutan s refugee mobilizers

physical proximity offers advantages in Nepal and India where organizing protests lobbying and collecting information about government abuse in Bhutan is aided by being close to the homeland But in an ecosystem of exile politics proximity is both a boon and a bane Sites proximate to Bhutan can be spaces of risk and disempowerment and refugee activists rarely secure legal political and social protection While distant diasporas in the Global North may not be in precarious situations they cannot tap into the advantages of proximity In examining these phenomena The Ecosystem of Exile Politics adds to theoretical understandings of exile politics and to empirical research on Bhutan and its refugee population **FCC Record** United States.
