Mixed-Signal Embedded Systems Design

Edward H. Currie,2021-11-27 This textbook introduces readers to mixed signal embedded design and provides in one place much of the basic information to engage in serious mixed signal design using Cypress PSoC Designing with PSoC technology can be a challenging undertaking especially for the novice This book brings together a wealth of information gathered from a large number of sources and combines it with the fundamentals of mixed signal embedded design making the PSoC learning curve ascent much less difficult The book covers sensors digital logic analog components PSoC peripherals and building blocks in considerable detail and each chapter includes illustrative examples exercises and an extensive bibliography

Energy Efficiency in Buildings José Manuel Andújar,Sergio Gómez Melgar,2020-04-28 Buildings are one of the main causes of the emission of greenhouse gases in the world Europe alone is responsible for more than 30% of emissions or about 900 million tons of CO₂ per year Heating and air conditioning are the main cause of greenhouse gas emissions in buildings Most buildings currently in use were built with poor energy efficiency criteria or depending on the country and the date of construction none at all Therefore regardless of whether construction regulations are becoming stricter the real challenge nowadays is the energy rehabilitation of existing buildings It is currently a priority to reduce or ideally eliminate the waste of energy in buildings and at the same time supply the necessary energy through renewable sources The first can be achieved by improving the architectural design construction methods and materials used as well as the efficiency of the facilities and systems the second can be achieved through the integration of renewable energy wind solar geothermal etc in buildings In any case regardless of whether the energy used is renewable or not the efficiency must always be taken into account The most profitable and clean energy is that which is not consumed Sjogren's Disease, An Issue of Rheumatic Disease Clinics of North America, E-Book

Dune Worlds Ralph D. Lorenz,James R. Zimbelman,2014-04-22 This book describes how sand dunes work why they are the way they are in different settings and how they are being studied Particular attention is paid to their formation and appearance elsewhere in the solar system New developments in knowledge about dunes make for an interesting story like the dunes themselves dune science is dynamic and the visual appeal of Aeolian geomorphology ensures that this is an attractive volume The book is divided into 4 parts the first of which introduces dunes as a planetary phenomenon showing a landscape reflecting the balance of geological processes volcanism impact tectonics erosion deposition of sediments Dunes are then considered as emergent dynamical systems the interaction of sand and wind conspires to generate very characteristic and reproducible shapes Analogies are given with other emergent structures such as patterned ground before the influence of dunes on desert peoples and infrastructure is studied together with their use as forensic climatological indicators Dune Physics is looked at with regard to the mechanics of sand the physics of wind saltation interaction of sand and air dunes versus ripples and transverse Aeolian ridges the classification of dune morphology

and the sources and sinks of sand Dune Trafficability considers soil mechanics effects on mobility on Earth Mars and elsewhere In the second part Earth Mars Titan and other moons and planets are examined beginning with a survey of the major deserts and dunefields on Earth The authors then turn to Mars and its environment sediment type dune stratigraphy sediment source and sinks and the association of dunes with topographic features Titan follows its thick cold atmosphere methane dampness low gravity morphology interaction with topography and the implications of dunes for climate and winds Dunes elsewhere conclude this part There are few dunefields on Venus but there is a possibility of Aeolian transport on Triton and volcanic related windstreaks on Io
