anything this country has seen since the Great Depression During the recovery the pace of growth in the nation s output has been anemic compared with that during most other recoveries since World War II and the unemployment rate has remained quite high For the federal government the sharply lower revenues and elevated spending deriving from the financial turmoil and severe drop in economic activity combined with the costs of various policies implemented in response to those conditions and an imbalance between revenues and spending that predated the recession have caused budget deficits to surge in the past two years The deficits of 1 4 trillion in 2009 and 1 3 trillion in 2010 are when measured as a share of gross domestic product GDP the largest since 1945 representing 10 0 percent and 8 9 percent of the nation s output respectively For 2011 the Congressional Budget Office CBO projects that if current laws remain unchanged the federal budget will show a deficit of close to 1 5 trillion or 9 8 percent of GDP The deficits in CBO s baseline projections drop markedly over the next few years as a share of output and average 3 1 percent of GDP from 2014 to 2021 Those projections however are based on the assumption that tax and spending policies unfold as specified in current law Consequently they understate the budget deficits that would occur if many policies currently in place were continued rather than allowed to expire as scheduled under current law
