Resources and sustainability

1. FIGURE A:

Resources use and sustainability

- **Resources:** things a country can use, such as minerals, fish and timber
- **Natural resources:** resources which come from nature and not manmade
- **Depletion:** reducing by a large amount so that there is not enough left
- **Stock:** the total amount of something that is available to be used

Natural resources

Air, water, sunlight, oil, wood, coal and many others.

Uses of natural resources

Solar power: sunlight is used to create solar energy. Sunshine is a free resource. It is also clean energy because it does not cause pollution.

Wood and coal: natural resources for heating.

Wood is a renewable resource and a form of energy. Because new trees can be grown to replace those that haven't been chopped down.

Renewable resources

- Renewable resources can replace themselves.
- They can be used over and over if used wisely.

Non-renewable resources

- These are resources that can only be used once and do not replace themselves. They can eventually be used up.
- Coal and other minerals, such as gold ore are examples of non-renewable resources.
- When coal is taken out of the ground and burnt it provides heat, however new coal and all minerals take millions of years to form.

2014 Grd11 Geography Term4 Memorandum:

The Russian State and Russian Energy Companies, 1992-2018 Ingerid M. Opdahl, 2020-06-09 The Russian State and Russian Energy Companies analyses the development of relations between the state and five major energy companies and how this shaped Russia's foreign policy in the post Soviet region The book argues that the development of Russia's political economy mattered for foreign policy over the quarter of a century from 1992 to 2018 Energy companies' roles in institutional development enabled them to influence foreign policy formation and they became available as tools to implement foreign policy The extent to which it happened for each company varied with their accessibility to the Russian state Institutional development increased state capacity in a way that strengthened Russia's political regime The book shows how the combined power of several companies in the gas oil electricity and nuclear energy industry was a key feature of Russian foreign policy both in bilateral relationships and in support of Russia's regional position In this way Russia's energy resources were converted to regional influence The book contributes to our understanding of Russia's political economy and its influence on foreign policy and of the formation of policy towards post Soviet states *International Encyclopedia of the Social & Behavioral Sciences* Neil J. Smelser, Paul B.
