Resources Food and Agriculture Organization of the United Nations,2025-03-25 Forests and woodlands provide a huge array of essential benefits for people and the planet such as hosting biodiversity supporting livelihoods protecting soils regulating water cycles and mitigating climate change At the heart of such benefits are forest genetic resources the heritable materials maintained within and among tree and other woody plant species that are of actual or potential economic environmental scientific or societal value These genetic resources underpin the resilience adaptability and productivity of forests and other tree based systems enabling them to withstand environmental stresses and thereby continue providing vital ecosystem services Drawing on data and information from 77 countries representing more than three quarters of the world s forests The Second Report on the State of the World s Forest Genetic Resources provides a global assessment of forest genetic resources It highlights the crucial role of these resources for sustainable development and examines progress in implementing the Global Plan of Action for the Conservation Sustainable Use and Development of Forest Genetic Resources The report reviews scientific advances and concludes with recommendations for continued action at the national regional and global levels to ensure that forest genetic resources are sustainably managed for the benefit of current and future generations *The Geography of South Africa* Jasper Knight,Christian M. Rogerson,2018-10-03 This edited collection examines contemporary directions in geographical research on South Africa It encompasses a cross section of selected themes of critical importance not only to the discipline of Geography in South Africa but also of relevance to other areas of the Global South All chapters are original contributions providing a state of the art research baseline on key themes in physical human and environmental geography and in understanding the changing geographical landscapes of modern South Africa These contributions set the scene for an understanding of the relationships between modern South Africa and the wider contemporary world including issues of sustainable development and growth in the Global South Sustainability of Southern African Ecosystems under Global Change Graham P. von Maltitz,Guy F. Midgley,Jennifer Veitch,Christian Brümmer,Reimund P. Rötter,Finn A. assumed to hit southern Africa extremely hard with a significant increase in extreme events and the frequency of severe droughts heat waves and flooding Southern Africa hosts a high variety of ecosystems which belongs to important biodiversity hotspots for unique flora and fauna The surrounding oceans form in turn a bottle neck within the ocean s global thermohaline circulation act as a still poorly understood carbon sink and source and play an important role for fisheries as they are highly productive Considering these important aspects the book is an important interdisciplinary contribution to the scientific literature and will find a wide readership The book is aimed at students teachers and scientists in the fields of terrestrial and marine ecology environmental nature and landscape planning agriculture environmental and resource management biodiversity and nature conservation as well as scientists and representatives in specialised authorities and associations nature conservationists and policy makers of related disciplines

Vigilantes Beyond Borders Mette Eilstrup-Sangiovanni, J. C. Sharman, 2022-04-05 How and why NGOs are increasingly taking independent and direct action in global law enforcement from human rights to the environment Nongovernmental organizations NGOs have generally served as advocates and service providers leaving enforcement to states Now NGOs are increasingly acting as private police prosecutors and intelligence agencies in enforcing international law NGOs today can be found investigating and gathering evidence suing and prosecuting governments companies and individuals and even catching lawbreakers red handed Examining this trend *Vigilantes beyond Borders* considers why some transnational groups have opted to become enforcers of international law regarding such issues as human rights the environment and corruption while others have not Three factors explain the rise of vigilante enforcement demand supply and competition Governments commit to more international laws but do a poor job of policing them leaving a gap and creating demand Legal and technological changes make it easier for nonstate actors to supply enforcement as in the instances of NGOs that have standing to use domestic and international courts or smaller NGOs that employ satellite imagery

big data analysis and forensic computing As the growing number of NGOs vie for limited funding and media attention smaller more marginal groups often adopt radical strategies like enforcement Looking at the workings of major organizations including Amnesty International Greenpeace and Transparency International as well as smaller players such as Global Witness the Sea Shepherd Conservation Society and Bellingcat Vigilantes beyond Borders explores the causes and consequences of a novel provocative approach to global governance
