2014 Nissan Leaf Maintenance Schedule:

Infrastructure and Technology Management Tugrul U. Daim, Leong Chan, Judith Estep, 2018-01-10 This book presents emerging technology management approaches and applied cases from leading infrastructure sectors such as energy healthcare transportation and education Featuring timely topics such as fracking technology electric cars Google s eco friendly mobile technology and Amazon Prime Air the volume s contributions explore the current management challenges that have resulted from the development of new technologies and present tools applications and frameworks that can be utilized to overcome these challenges Emerging technologies make us rethink how our infrastructure will look in the future Solar and wind generation for example have already changed the dynamics of the power sector While they have helped to reduce the use of fossil fuels they have created management complications due to their intermittent natures Meanwhile information technologies have changed how we manage healthcare making it safer and more accessible but not without implications for cost and administration Autonomous cars are around the corner On line education is no longer a myth but still a largely unfulfilled opportunity Digitization of car ownership is achievable thanks to emerging business models leveraging new communication technologies The major challenge is how to evaluate the relative costs and benefits of these technologies This book offers insights from both researchers and industry practitioners to address this challenge and anticipate the impact of new technologies on infrastructure now and in the future

Artificial Intelligence-Empowered Modern Electric Vehicles in Smart Grid Systems Aparna Kumari, Sudeep Tanwar, 2024-05-23 Artificial Intelligence Empowered Modern Electric Vehicles in Smart Grid Systems Fundamentals Technologies and Solutions is an essential reference for energy researchers graduate students and engineers who aim to understand the opportunities offered by artificial intelligence for the integration of electric vehicles into smart grids This book begins by building foundational knowledge for the reader covering the essentials of artificial intelligence and its applications for electric vehicles in a clear and holistic manner Next it breaks down two essential areas of application in more detail energy management from energy harvesting to demand response and complex forecasting and market strategies including peer to peer vehicle to vehicle and vehicle to everything trading plus the cyber security implications A final part provides detailed case studies and close consideration of challenges including code and data sets for replication of techniques Providing a clear pathway from fundamentals to practical implementation Artificial Intelligence Empowered Modern Electric Vehicles in Smart Grid Systems will provide multidisciplinary guidance for implementing this cutting edge technology in the energy systems of the future Supports fundamental understanding of artificial intelligence and its opportunities for energy system specialists Collects the real world experiences of global experts Enables practical implementation of artificial intelligence strategies that support renewable energy integration across energy systems markets and grids

E-Mobility M. Kathiresan, G. R. Kanagachidambaresan, Sheldon S. Williamson, 2021-12-01 The book provides easy interpretable explanations for the key

technologies involved in Electric Vehicles and Hybrid Electric Vehicles The authors discuss the various electrical machines drives and controls used in EV and HEV The book provides a detailed coverage of Regenerative Braking Systems used in EV and HEV The book also illustrates the battery technology and battery management systems in EV and HEV This book is intended for academicians researchers and industrialists In addition this book has the following features Discusses the various Economic and Environmental Impact of Electric and Hybrid Electric Vehicles Discusses the role of Artificial Intelligence in Electric Hybrid Electric Vehicles Illustrates the concept of Vehicle to Grid Technology and the smart charging station infrastructure and issues involved in the same Elucidates the concept of Internet of Vehicles Presents the latest research and applications in alternate energy vehicles

30th International Conference on Organization and Technology of Maintenance (OTO 2021) Hrvoje Glavaš, Marijana Hadzima-Nyarko, Mirko Karakašić, Naida Ademović, Samir Avdaković, 2021-12-07 This book promotes an interdisciplinary approach to maintenance through the presentation of practical and theoretical research in the field of electrical civil and mechanical engineering The goal is to raise the level of maintenance knowledge taking into account the continuous advancement of engineering and technology in all spheres of economy infrastructure and public services This book contains papers presented at the 30th International Conference on Organization and Technology of Maintenance OTO 2021 and the conference was held on Josip Juraj Strossmayer University of Osijek Faculty of Electrical Engineering Computer Science and Information Technology Osijek on 10 11 December 2021 The book brings 36 original papers written by authors from ten countries that underwent a blind review process by the international review board members The conference covers the topics as organization and management of maintenance maintenance technologies quality management in system maintenance information systems in maintenance product lifecycle management design for maintainability material and structure properties reliability of technical systems and environmental safety diagnosis and prognosis of failures and operational malfunctions design optimization for maintenance maintenance in technical systems analysis of efficiency and cost effectiveness of maintenance influence of maintenance on the environment and employee safety maintenance legislation and education for maintenance The papers presented in the book reflect the current state of approach to maintenance as an interdisciplinary field The OTO conference proved itself as an ideal opportunity for communication between scientists and experts in maintenance practice with the aim to raise the level of expertise and introduce new methods and maintenance procedures into everyday practice

Development and Testing of Vehicle Software and its Influence on Sustainable Transport Antonio Colmenar-Santos, David Borge-Diez, Pedro-Miguel Ortega-Cabezas, 2024-01-10 This book evaluates the contributions of the electronic control unit software of an electric vehicle on sustainability and society such as the reduction of emissions during a product design and the improvements in the vehicle A sustainable transport model is proposed demonstrating its economic viability By validating software in a more efficient way and adding new functionalities to the software to enhance driving

efficiency energy consumption can be significantly reduced Therefore software validation and development have a significant impact on sustainability This book offers innovative validation solutions based on artificial intelligence techniques to reduce validation time and emissions The impact of driving efficiency on sustainable transport models is studied in detail making proposals to be considered in the current environmental policies under discussion within the European Union in order to improve the sustainability of transport models Vehicles are becoming sophisticated electronic systems due to the fact that they are integrating a significant number of electronic control units This trend will certainly continue in the year to come Consequently software validation techniques are a key element for car manufacturers in order to ensure the quality of the vehicle This book contributes to these efforts

Cost, Effectiveness, and Deployment of Fuel Economy Technologies for Light-Duty Vehicles National Research Council, Division on Engineering and Physical Sciences, Board on Energy and Environmental Systems, Committee on the Assessment of Technologies for Improving Fuel Economy of Light-Duty Vehicles, Phase 2, 2015-09-28 The light duty vehicle fleet is expected to undergo substantial technological changes over the next several decades New powertrain designs alternative fuels advanced materials and significant changes to the vehicle body are being driven by increasingly stringent fuel economy and greenhouse gas emission standards By the end of the next decade cars and light duty trucks will be more fuel efficient weigh less emit less air pollutants have more safety features and will be more expensive to purchase relative to current vehicles Though the gasoline powered spark ignition engine will continue to be the dominant powertrain configuration even through 2030 such vehicles will be equipped with advanced technologies materials electronics and controls and aerodynamics And by 2030 the deployment of alternative methods to propel and fuel vehicles and alternative modes of transportation including autonomous vehicles will be well underway What are these new technologies how will they work and will some technologies be more effective than others Written to inform The United States Department of Transportation s National Highway Traffic Safety Administration NHTSA and Environmental Protection Agency EPA Corporate Average Fuel Economy CAFE and greenhouse gas GHG emission standards this new report from the National Research Council is a technical evaluation of costs benefits and implementation issues of fuel reduction technologies for next generation light duty vehicles Cost Effectiveness and Deployment of Fuel Economy Technologies for Light Duty Vehicles estimates the cost potential efficiency improvements and barriers to commercial deployment of technologies that might be employed from 2020 to 2030 This report describes these promising technologies and makes recommendations for their inclusion on the list of technologies applicable for the 2017 2025 CAFE standards

Marketing Paul Baines, Sara Rosengren, Paolo Antonetti, 2022 How does Google support organizations in their transformation to digital marketing How does the International Food Waste Coalition influence more sustainable behaviour How did a producer of Thai herbal toothpaste amend their marketing mix to maintain sales during COVID 19 With insights from leading practitioners and exploration of the latest issues to affect consumers and businesses alike Marketing answers these questions

and more to provide students with the skills they need to successfully engage with marketing across all areas of society. Founded on rigorous research, this critical text presents a current, complete guide to marketing success and explores topical issues such as sustainability and digital transformation. Its broadest ever range of examples, Practitioner Insights and Market Insights, also give readers a unique view into the fascinating worlds of marketing professionals. Individuals from Arch Creative, Klarna, eDreams, Odigeo and Watson Farley and Williams are just a few of the practitioners that join the authors to offer real life insights and career advice to those starting out in the industry. Review and discussion questions conclude each chapter, prompting readers to examine the themes discussed in more detail and encouraging them to engage critically with the theory. New critical thinking questions also accompany the links to seminal papers throughout each chapter, presenting the opportunity for students to take their learning further. An exciting development for this new edition, the enhanced e-book offers an even more flexible and engaging way to learn. It features a select range of embedded digital resources designed to stimulate, assess and consolidate learning, including practitioner videos to offer further glimpses into the professional world, multiple choice questions after each key section of the chapter to offer regular revision and understanding checkpoints, and a flashcard glossary at the end of each chapter to test retention of key terms and concepts. Marketing is the complete package for any introductory marketing module. This book is accompanied by the following online resources:

- For everyone: Bank of case studies, Practitioner insight videos, Career insight videos, Library of video links.
- For students: Key concept videos, Author audio podcasts, Multiple choice questions, Flashcard glossary, Internet activities, Research insights, Web links.
- For lecturers: PowerPoint slides, Test bank, Essay questions, Tutorial activities, Discussion question pointers, Figures and tables from the book.

The Bhutan Electric Vehicle Initiative Da Zhu, Dominic Pasquale Patella, Roland Steinmetz, Pajnapa

Peamsilpakulchorn, 2016-04-06. As the country that inspires the world with gross national happiness development philosophy, Bhutan is striving to pursue its economic growth while committing to its core values of inclusive and green development. Even with robust economic growth rates, Bhutan's dependence on imports and hydropower revenues drives the country to search for a self-reliant option to fuel the economy while further decarbonizing the economy. Electric vehicle is being explored as one of the key policies to introduce green mobility, reduce fossil fuel imports, and put the country firmly on a green growth path. Globally, electric vehicles market and technology are still in the nascent stage but are developing rapidly. The automotive industry has adopted electrification as a pillar of future drive train technology. EV uptake is expected to increase significantly with ongoing improvements in technology and resulting cost decreases in the global market. This report aims to help Bhutan think through various technical and policy issues of introducing electric vehicles in its own context. It analyses a variety of factors that will impact adoption of electric vehicles, from technical market and financial feasibility to consumer awareness and stakeholders capacity. It also addresses several policy questions which are at the heart of public debate, such as affordability of the government to undertake the program, economic costs and benefits, distributional impact, fiscal and

macroeconomic implications Drawing from vast international experiences the report examines in great technical details how global cutting edge technology like electric vehicles could be pursued in the context of developing economies with different socio economic characteristics and constraints compared to advanced economies It will help readers better grasp the technical financial economic and social challenges as well as opportunities in initiating electric vehicles program and provide practical recommendations that will be useful for policy makers in designing their own EV initiative

Energy and Sustainability V H.H. Al-Kayiem,C.A. Brebbia,S.S. Zubir,2014-12-16 Energy and Sustainability V is the proceedings of the 5th International Conference on Energy and Sustainability held by the Wessex Institute of Technology The modern world is highly dependent on the exploitation of fossil fuels More recently resources depletion and severe environmental effects deriving from the continuous use of these fuels has resulted in an increasing amount of interest in renewable energy resources and the search for sustainable energy policies The changes required to progress from an economy mainly based on hydrocarbons to one taking advantage of sustainable energy resources are massive and require considerable scientific research as well as engineering systems The effect also involves collaboration between different disciplines in order to arrive at optimum solutions including buildings energy networks convenience systems new energy storage solutions waste to energy technologies and many others This book covers topics related to sustainability in energy and power production storage distribution and management These include Smart grids Smart metering Green ICT Green buildings Energy storage Renewable energy resources Plug in Hybrid Vehicles PHEV Biofuels solid liquid gas Waste to energy CO2 capturing and management Energy and transportation Environmental risk Energy policies Greener power plant technologies Hydrogen recovery techniques Sustainable energy production

Energy Economics Roy L. Nersesian,2016-03-02 Three quarters of our current electricity usage and transport methods are derived from fossil fuels and yet within two centuries these resources will dry up Energy Economics covers the role of each fossil and renewable energy source in today s world providing the information and tools that will enable students to understand the finite nature of fossil fuels and the alternative solutions that are available This textbook provides detailed examinations of key energy sources both fossil fuels and renewables including oil coal solar and wind power and summarises how the current economics of energy evolved Subsequent chapters explore issues around policy technology and the possible future for each type of energy In addition to this readers are introduced to controversial topics including fracking and global warming in dedicated chapters on climate change and sustainability Each chapter concludes with a series of tasks providing example problems and projects in order to further explore the proposed issues An accompanying companion website contains extensive additional material on the history of the major types of fuel as well as technical material relating to oil exploration the development of solar power and historical environmental legislation This textbook is an essential text for those who study energy economics resource economics or energy policy

Advances in Battery Manufacturing, Service, and Management Systems Jingshan Li,Shiyu

Zhou, Yehui Han, 2016-10-24 Addresses the methodology and theoretical foundation of battery manufacturing service and management systems BM2S2 and discusses the issues and challenges in these areas This book brings together experts in the field to highlight the cutting edge research advances in BM2S2 and to promote an innovative integrated research framework responding to the challenges There are three major parts included in this book manufacturing service and management The first part focuses on battery manufacturing systems including modeling analysis design and control as well as economic and risk analyses The second part focuses on information technology's impact on service systems such as data driven reliability modeling failure prognosis and service decision making methodologies for battery services The third part addresses battery management systems BMS for control and optimization of battery cells operations and hybrid storage systems to ensure overall performance and safety as well as EV management The contributors consist of experts from universities industry research centers and government agency In addition this book Provides comprehensive overviews of lithium ion battery and battery electrical vehicle manufacturing as well as economic returns and government support Introduces integrated models for quality propagation and productivity improvement as well as indicators for bottleneck identification and mitigation in battery manufacturing Covers models and diagnosis algorithms for battery SOC and SOH estimation data driven prognosis algorithms for predicting the remaining useful life RUL of battery SOC and SOH Presents mathematical models and novel structure of battery equalizers in battery management systems BMS Reviews the state of the art of battery supercapacitor and battery supercapacitor hybrid energy storage systems HESSs for advanced electric vehicle applications Advances in Battery Manufacturing Services and Management Systems is written for researchers and engineers working on battery manufacturing service operations logistics and management It can also serve as a reference for senior undergraduate and graduate students interested in BM2S2

Transition Towards 100% Renewable Energy Ali Sayigh, 2018-01-29 This book contains selected papers presented during technical and plenary sessions at the World Renewable Energy Congress the world's premier conference on renewable energy and sustainable development All papers were rigorously peer reviewed The Congress held at Murdoch University in Perth Western Australia from February 5-9 2017 with the theme of Transition Towards 100% Renewable Energy featured keynote speakers and parallel technical sessions highlighting technical policy and investment progress towards achieving 100% renewable energy ranging in scale from households to cities to large regions with a focus on the challenges and opportunities transforming the global energy systems The book highlights contributions from thought leaders involved in the supply distribution consumption and development of sustainable energy sources

Tools of Transport Telematics Jerzy Mikulski, 2016-01-12 This book constitutes the proceedings of the 15th International Conference on Transport Systems Telematics TST 2015 held in Wrocaw Poland in April 2015 The 35 revised full papers and two short papers included in this volume were carefully reviewed and selected from 115 submissions The papers provide an overview of solutions being developed in the fields of transport telematics and intelligent transport

systems **Smart Grid** Hussein Mouftah, Melike Erol-Kantarci, 2017-12-19 Smart Grid Networking Data Management and Business Models delivers a comprehensive overview of smart grid communications discussing the latest advances in the technology the related cyber security issues and the best ways to manage user demand and pricing Comprised of 16 chapters authored by world renowned experts this book Considers the use of cognitive radio and software defined networking in the smart grid Explores the space of attacks in the energy management process the need for a smart grid simulator and the management issues that arise around smart cities Describes a real time pricing scheme that aims to reduce the peak to average load ratio Explains how to realize low carbon economies and the green smart grid through the pervasive management of demand Presents cutting edge research on microgrids electric vehicles and energy trading in the smart grid Thus Smart Grid Networking Data Management and Business Models provides a valuable reference for utility operators telecom operators communications engineers power engineers electric vehicle original equipment manufacturers OEMs electric vehicle service providers university professors researchers and students **E-Mobility in Europe** Walter Leal Filho, Richard Kotter, 2015-04-27 Focusing on technical policy and social societal practices and innovations for electrified transport for personal public and freight purposes this book provides a state of the art overview of developments in e mobility in Europe and the West Coast of the USA It serves as a learning base for further implementing and commercially developing this field for the benefit of society the environment and public health as well as for economic development and private industry A fast growing interdisciplinary sector electric mobility links engineering infrastructure environment transport and sustainable development But despite the relevance of the topic few publications have ever attempted to document or promote the wide range of electric mobility initiatives and projects taking place today Addressing this need this publication consists of case studies reports on technological developments and examples of successful infrastructure installation in cities which document current initiatives and serve as an inspiration for others **Energy Economics** Peter M. Schwarz, 2022-10-24 Energy Economics outlines the fundamental issues and possible solutions to the challenges of energy production and use presenting a framework for decisions based upon sound economic analysis This approach considers market forces and policy goals including economic prosperity environmental protection and societal well being The second edition has been thoroughly updated addressing dramatic shifts in the use of fuel and electricity accelerated plans for the use of renewable energy and pathways towards a lower carbon future A new chapter on electric vehicles examines its impact on transportation the electricity market and carbon emissions Global examples throughout the book reflect the universal application of energy economics With this economic foundation coupled with perspectives from real world applications and perspectives from related disciplines this text sharpens the student s ability to understand evaluate and critique energy policy A companion website provides reinforcement for students through multiple choice self test quizzes and homework exercises as well as additional materials for instructors This textbook should be essential reading for students of energy economics environmental

and natural resource economics energy related disciplines and general readers seeking to expand their knowledge of energy economics and policy *Towards a Sustainable Economy* Pascal da Costa, Danielle Attias, 2018-06-26 This book provides an interdisciplinary account of how technological advances mainly in the domains of energy and transportation contribute to the transformation towards a more sustainable economic system Drawing on methods from engineering the management sciences and economics which it combines in the framework of a systems sciences approach the book presents qualitative and quantitative studies on government regulation resources management and firms strategy Topics covered include the state market dilemma of government CO2 emission targets implications of the electrification of the economy incentives and coercion in government transport policies and innovations in the electric vehicle industry **Modeling and Simulation for Electric Vehicle Applications** Mohamed Amine Fakhfakh, 2016-10-05 The book presents interesting topics from the area of modeling and simulation of electric vehicles application The results presented by the authors of the book chapters are very interesting and inspiring The book will familiarize the readers with the solutions and enable the readers to enlarge them by their own research It will be useful for students of Electrical Engineering it helps them solve practical problems

Communicating Mobility and Technology Ehren Helmut Pflugfelder, 2016-07-07 Winner of the 2018 CCCC Technical and Scientific Communication Award in the category of Best Book in Technical or Scientific Communication Responding to the effects of human mobility and crises such as depleting oil supplies Ehren Helmut Pflugfelder turns specifically to automobility a term used to describe the kinds of mobility afforded by autonomous automobile based movement technologies and their ramifications Thus far few studies in technical communication have explored the development of mobility technologies the immense power that highly structured environmentally significant systems have in the world or the human machine interactions that take place in such activities Applying kinaesthetic rhetoric a rhetoric that is sensitive to and developed from the mobile material context of these technologies Pflugfelder looks at transportation projects such as electric taxi cabs from the turn of the century to modern day open source vehicle projects and a large case study of an autonomous electric pod car network that ultimately failed Kinaesthetic rhetoric illuminates how mobility technologies have always been persuasive wherever and whenever linguistic symbol systems and material interactions enroll us often unconsciously into regimes of movement and ways of experiencing the world As Pflugfelder shows mobility technologies involve networks of sustained arguments that are as durable as the bonds between the actors in their networks **Smart and Green Solutions for Transport Systems** Grzegorz Sierpiński, 2019-11-13 This proceedings book gathers selected papers presented at the 16th Scientific and Technical Conference Transport Systems Theory and Practice organised by the Department of Transport Systems and Traffic Engineering at the Faculty of Transport of the Silesian University of Technology The conference was held on 16-18 September 2019 in Katowice Poland More details at www.TSTP.polsl.pl Which of the multi criteria methods should be applied to support decision making processes while tackling problems of sustainable transport solutions How can

individual issues encountered when implementing smart solutions in transport systems be solved What advanced tools can be used to assess the current condition of selected elements of transport systems both in terms of transport infrastructure and traffic streams What data concerning transport processes can be collected automatically and how can we use it What is the right approach to the problem of the development of the spatial planning of transport systems This book provides the answers to these and many other questions It also includes a wealth of numerical analyses based on significant data sets illustrating the close affiliation between smart transport systems and environment friendly solutions The book primarily addresses the needs of three target groups Scientists and researchers ITS field Those working for local authorities responsible for the transport systems at the urban and regional levels Representatives of business traffic strategy management and industry manufacturers of ITS components
