Lecture Notes in Analog Electronics Vančo B. Litovski, 2023-01-29 This book discusses larger signal amplifiers denoted as PA Large signal amplifiers are dealing with signals whose magnitude is such that the operation of the active element can no longer be considered linear

They are usually designed to get as much power gain and efficiency as possible That is why they are often called power amplifiers In this book two implementations of PA are considered First it is of interest to obtain large signals current or voltage at the output of a cascade of direct coupled amplifiers In this case linearity frequency response and speed are the most important requirements Second are real power amplifiers where the power delivered to the load is of primary interest Of course efficiency linearity and high frequency response are of interest too A very special attention is paid to modern power electronic components such as Power BJT VDMOS IGBT SiC MOS and GaN HEMT DC and switching properties of all these devices are studied in much detail This book also includes a set of appendices which cover solved problems SPICE simulation results for selected set of circuits and a short review of microelectronic technology process

Lecture Notes in Analog Electronics Vančo Litovski,2023-06-06 The book opens a magic miniature world of electronics to the reader The book addresses what small means in terms of electronics and what clean means in terms of modern electronic technology Consequently the reader understands why the most advanced civilization of the ancient world the Egyptians was not capable to do electronics The book also discusses functionalities of the low voltage electronic components with the aim to implement them in electronic circuit design At the same time it also opens the space of electronic component design to the readers be it discrete or integrated The book has an introduction section 11 chapters an appendix index and list of literature Appendix A discusses a set of solved problems Appendix B presents SPICE simulation examples and Appendix C presents component numbering in marketing environment
