budgeting and finance can be found in the journals that ASPA publishes or sponsors For this volume editor Irene Rubin has brought together the best of these articles emerging classics that address the most important theoretical and practical problems underlying public budgeting The anthology is organized topically rather than historically with an effort to delineate the issues needed to understand some of the more recent controversies in the field Rubin s introductory essay and section openers frame the key issues and provide historical context for each article The collection begins with descriptions of what

public budgeting is where it comes from and what it is for It moves on to the relationship between budget processes and outcomes constraints on budgeting the legal context in which it operates and adaptations to those constraints such as contracting out The book concludes with a discussion of the ethics and norms that underlie budgeting in a democracy Throughout the anthology the emphasis is on areas of disagreement and debate so students can get involved and explore different viewpoints Conference Papers: Green Paper on Supporting Voluntary Activity (23-24 February 1998) ,

Committee on Ways and Means,1988 **Gambling and Speculation** Reuven Brenner,Gabrielle A. Brenner,1990-03-30 Gambling and Speculation takes the long historic perspective of its controversial subject The book offers not only a better understanding of the recent gambling craze but also a fundamental inquiry into human nature and the structure of societies The Brenners argue that the negative image of gamblers and of speculators stems from prejudice whose roots are in the distant forgotten past Legal scholars have frequently confused gambling with speculation and the anti gambling laws were at times erroneously interpreted as implying the prohibitions of contracts in futures and insurance markets One consequence of all this confusion was that during this century both in the United States and England the legislation and law on betting and gambling became ambiguous The authors touch on this issue and make policy recommendations to abolish restrictions on the industry diminish the states role in selling lotteries and at the same time make legal distinctions capable of helping the tiny percentage of players who might be addicted The Brenners recommendations on gambling are based on their conclusion that gamblers are neither mentally ill nor criminals and that gambling does not lead its practitioners to poverty Rather it is the other way around some of the poor and the frustrated gamble Looking at gambling in this way leads to questions about the nature of society What do the fortunate do for those who are not What is society s obligation to people who fall behind in the game of life Answers to these questions require a discussion on the principles of equality capitalism the role of religious influence on society topics that the Brenners have discussed in their previous studies and they do so here too putting gambling within its proper historical context
