Biomedical Visualisation Ourania Varsou,Paul M. Rea,Michelle Welsh,2022-12-16 This book focuses on the challenges to biomedical education posed by the lockdowns and restrictions to on campus teaching brought about by the COVID 19 pandemic and highlights the tools and digital visualization technologies that have been successfully developed and used for remote teaching Biomedical education for science medical dental and allied health professionals relies on teaching visual and tactile knowledge using practice based approaches This has been delivered for decades via on campus lectures workshops and laboratories teaching practical skills as well as fundamental knowledge and understanding However the arrival of the COVID 19 pandemic meant that education across the globe had to pivot very quickly to be able to deliver these skills and knowledge in a predominantly online environment This brought with it many challenges as Higher Education staff had to adapt to deliver these visual subjects remotely This book addresses the challenges and solutions faced by Higher Education staff in teaching visual content in distance education Chapters include literature reviews original research and pedagogical reflections for a wide range of biomedical subjects degrees such as medicine dentistry and veterinary sciences with examples

from undergraduate and postgraduate settings The goal of the book is to provide a compendium of expertise based on evidence gathered during the COVID 19 pandemic as well as reflections on the challenges and lessons learned from this dramatic shift in teaching It also presents new examples of best practices that have emerged from this experience to ensure that they are not lost as we return to on campus learning in a new era of biomedical teaching This book will be of interest to anyone looking for a helpful reference point when designing online or blended teaching for visual practice based subjects

SAMT ,1975 Radiology Core Review Alexander G. Pitman,Nancy M.
