 Salvatore Blair, Lynette Rushton, 2021-11-01. Much like the nervous system, the endocrine system relays important communication signals throughout the body. The endocrine system uses chemical signals known as hormones, which are produced and stored in special glands in the body. Different glands produce specialized hormones and release them into the bloodstream. From there, these hormones can travel directly to the tissues and organs and help regulate bodily functions. In *The Endocrine System, Third Edition*, learn how this chemical messaging system is vital to the body's growth, metabolism, and sexual development. Packed with full-color photographs and illustrations, this absorbing book provides students with sufficient background information through references, websites, and a bibliography.

Examination Questions and Answers in Basic Anatomy and Physiology
 Martin Caon, 2020-08-03. This third edition provides 2900 multiple-choice questions on human anatomy and physiology and some biophysical science, separated into 20 chapters and 68 categories. In addition, there are 64 essay topics. The answer to each question is accompanied by an explanation. Each chapter has an introduction to set the scene for the questions to come. However, not all possible information is provided within these introductions, so an *Anatomy and Physiology* textbook is an indispensable aid to understanding the answers. The textbook offers a more holistic approach to the subjects of anatomy and physiology by also including biomechanics, biophysics, and biochemistry. The questions have been used in end-of-semester examinations for undergraduate anatomy and physiology courses and, as such, reflect the focus of these particular courses and are pitched at this level to challenge students that are beginning their training in anatomy and physiology. The question and answer combinations are intended for use by teachers to select questions for their next examinations and by students when studying for an upcoming test. Students enrolled in the courses for which these questions were written include nursing, midwifery, paramedic, physiotherapy, occupational therapy, nutrition, and dietetics, health sciences, exercise science, and students taking an anatomy and physiology course as an elective.
