Daily Weather Maps Climate Analysis Center (U.S.),1985 A Program for Computing Steady Inviscid Three-dimensional Supersonic Flow on Reentry Vehicles J. M. Solomon,M. Ciment,R. E. Ferguson,J. B. Bell,A. B Wardlaw (Jr),1977 A comprehensive computational procedure is presented for predicting the supersonic region of the flow field on advanced reentry vehicle shapes in steady flight at pitch and yaw The procedure utilizes explicit second order accurate finite difference methods applied to the conservation law form of the steady inviscid flow equations Improved numerical methods are used at the body surface and the bow shock wave Provisions for treating body geometries with discontinuous slopes are also included Either perfect gas or real gas equilibrium thermodynamic properties can be used The computational procedure is implemented as a FORTRAN computer code which provides a practicable representation of the inviscid flow field and the resulting aerodynamic force and moment on the vehicle In this report Vol I the analytical and numerical development of the procedure is presented and the associated computer code is described A comparison report Vol II User s Manual contains detailed instructions for operating the code and interpreting the output results Author **German Explosive Ordnance** United States. The HLA System John Lee,2012-12-06 This volume documents our growing understanding of the human major histocompatibility complex The application of this information is ever more important as the limits of transplantation continue to be reduced including the recent success of bone marrow transplantation between unrelated but closely matched individuals In addition the need to transfuse platelets in the face of immunologic barriers continues to challenge transfusion services Thus the serologic information summarized in this volume is essential for optimal patient care At the same time recombinant DNA technology has led to a revolution in our understanding of many aspects of basic biology Among the advances has been the initial characterization of the structure of some HLA loci While this will ultimately improve clinical services constant reference to serologic data is essential so that the powerful new techniques can be applied in the most effective ways The timing of the First Red Cross International Histocompatibility Workshop is fortunate as it brings together experts from around the world to address the state of the art We are all grateful to Dr John Lee and his colleagues for organizing the workshop and for bringing together in this volume the material to be presented in Beijing during October 17 23 1990 Leon W Hoyer M D **The French Civil Code in the Free City of Cracow (1815-1846)** Andrzej
