Blogs Mario Camilleri, 2007-01-01 Weblogs or blogs are possibly the most visible of the Web 2.0 technologies described by some as push button publishing for the people. This publication is one of the outcomes of an ECML project which over the course of three years investigated the design of an educational blogging platform and its use in the language classroom. It is intended for the language teacher who wishes to harness the potential of the writable Web in his or her language class, the teacher trainer who promotes a social constructivist paradigm and the educational software designer who seeks to create flexible educational tools which incorporate subversion. The accompanying CD Rom contains the entire corpus of blogs, warts and all, produced by project participants over 4 000 posts and 9 000 comments as well as the educational blogging platform prototype developed for this project which is an open source release under the GNU General Public License.

Lyn Strutt, ELT author and Chair of the British Council Families Association. Each year thousands of people all over the world take one of the hundreds of available short pre-service courses that lead to the award of a certificate in
