Internships and Summer Jobs, 2-Volume Set Carol Turkington,2014-05-14 Provides details on over 550 internships and summer jobs **Sculpture and the Garden** Patrick Eyres,2017-07-05 Although the integration of sculpture in gardens is part of a long tradition dating back at least to antiquity the sculptures themselves are often overlooked both in the history of art and in the history of the garden This collection of essays considers the changing relationship between sculpture and gardens over the last three centuries focusing on four British archetypes the Georgian landscape garden the Victorian urban park the outdoor spaces of twentieth century modernism and the late twentieth century sculpture park Through a series of case studies exploring the contemporaneous audiences of gardens the book uncovers the social political and gendered messages revealed by sculpture s placement and suggests that the garden can itself be read as a sculptural landscape

The Phrenological Journal and Life Illustrated ,1866 **Perspectives on Garden Histories** Michel Conan,1999 Garden history is a discipline of contested purposes Perspectives on Garden Histories contributes to a self critical examination of this emergent field of study at the same time offering an overview of its main achievements in several domains such as Italian and Mughal gardens and of the new kinds of investigation to which they have led In its early years garden history centered on architectural studies of garden design but in the 1960s the emphasis shifted from garden design to garden meaning The new paradigm considered gardens as complex works of art and demanded an extensive documentation of the historical context as well as of the figurative and discursive sources This approach in its turn was challenged by neo Marxist scholars who proceeded to view landscape appreciation as an ideological superstructure an outgrowth of agricultural production processes Garden designs and their histories can also be viewed as expressions of ideological conflicts in society Neither gardens nor their history can thus be studied independently of the social cultural and political movements that give prominence to the contested ideologies Gardens can be used to foster some ideologies or reflect a reaction against a social change Comparative research offers another fascinating approach exploring the relations between European landscape concepts and other cultural contexts and discussing issues of cultural dominance and interpretation The emergence of various perspectives has led to the incorporation of further questions into the domain of garden studies which has been moving in new directions and using new methods in search of an adapted theoretical framework This volume offers a striking view of changes taking place in the discipline **Index of Bicentennial Activities** American Revolution Bicentennial Administration,1976 Greater Perfections John Dixon Hunt,2000 Greater Perfections explores the meanings of garden and its relationship to other interventions into the natural world But above all it offers a new and challenging account of the role of representation in
