Biri, Kudzai, 2021-03-17 This volume captures the experiences of single women in Zimbabwe It brings out the indigenous cultural socialisations that negatively impact on them The vibrancy of Pentecostalism did not save them from stigma and negative perceptions but rather fuels their challenges and misery The over glorification of marriage over and above singlehood and in extreme cases denunciation of singlehood has implications for single women especially for those who have divorced The attitudes and perceptions towards single women in the families society and Church are largely adversarial and do not attach dignity and value in a nation where marriage and motherhood remain important and cherished statuses Therefore the author adopts a multi dimensional approach in analysing and critiquing the pitfalls of Shona indigenous cultures limitations of Pentecostal gender ideology and proffers avenues that can create safe spaces for single women

The Question of Being in Western and African Analytic Metaphysics Grivas Muchineripi Kayange, 2021-05-04 The main aim of this book is to discuss fundamental developments on the question of being in Western and African philosophy using analytic metaphysics as a framework It starts with the two orthodox responses to the question of being namely the subject verb object language view and the rheomodic language view In the first view being is conceived through the analysis of language structure where it is represented by subjects particulars objects and relations often universals In the second view there are different variations however the common idea is that the world s structure is revealed in the root verb of terms This suggests a holistic and dynamic conception of being where everything is in a continuous process of action The book builds on analytic philosophy and explores metaphysical concepts such as space time modality causation indeterminism versus

determinism and mind and body The book shows that in both Western and African thought i similarities in different studies confirm that philosophy is a universal activity ii differences within a context and beyond confirm the perspectival nature of human knowledge as individuals attempt to interpret reality and iii language influences the conceptualization of being in a particular area One of the novel aspects is the development of visual and mathematical African models of space and time
