Marks, 1997 How do we evaluate the safety and benefit of new drugs What tasks do we hold the government responsible for and which ones do we leave to the medical profession Harry Marks explores the origins of our contemporary system of drug regulation and the modern clinical trial He shows that the story of modern drug regulation is synonymous with the history of therapeutic reform Accompanying this history of public policy is a detailed account of changing experimental ideal and practices Marks follows the history of therapeutic experimentation from the collective investigations of the last century to the controlled clinical trial which emerged after 1950 as the paradigm of scientific experimentation The result is the first general history of clinical research in the United States a book which examines therapeutic experiments in a wide range of diseases from syphilis and pneumonia to heart disease and diabetes *The Melting Point* Kenneth F. McKenzie, 2024-05-28 As the Commander of U S Central Command General Frank McKenzie oversaw some of the most important and controversial operations in modern U S military history He had direct operational responsibility for the strikes on Qassem Soleimani and two successive leaders of ISIS the many months of deterrence operations against Iran and its proxies and the methodical drawdown in Iraq He directed the noncombatant evacuation operation in Afghanistan and our final withdrawal from that tortured country The Melting Point has three themes The first one is the importance of the primacy of civilian control of the military It has become a widely perceived truth that this control has been eroded over the past few years General McKenzie doesn't believe that to be the case and he speaks with some authority on the matter arguing that the civ mil relationship isn't perfect or frictionless but it doesn't have to be and probably shouldn't be It is however more durable than many believe and is supported and embraced by the military to a degree that some critics do not choose to recognize The second theme is the uniqueness of being a combatant commander Combatant commanders participate in the development of policy although as junior partners They are also responsible for the execution of policy once civilian leaders have formulated their decision a unique position and very

different than the role of a service chief or even the Chairman of the Joint Chiefs of Staff. None of these officers are in the chain of command and they have no ultimate moral responsibility or authority for execution. Only the combatant commander stands astride the boundary of decision making and execution. Finally the third theme that McKenzie argues is that leaders matter and the decisions they make have a profound effect on what happens on the battlefield. McKenzie provides an honest assessment of his time in command describing decisions that were sound as well as some outcomes he wishes were different. He offers a vivid portrait of leadership in action in one of the most volatile regions of the world.
