The Art and Science of Trauma and the Autobiographical Meg Jensen, 2019-01-04 This book examines posttraumatic autobiographical projects elucidating the complex relationship between the science of trauma and how that idea is understood across various scientific disciplines and the rhetorical strategies of fragmentation dissociation reticence

and repetitive troping widely used the representation of traumatic experience From autobiographical fictions to prison poems from witness testimony to autography and from testimonio to war memorials otherwise dissimilar projects speak of past suffering through a limited and even predictable discourse in search of healing Drawing on approaches from literary human rights and cultural studies that highlight relations between trauma language meaning and self hood and the latest research on the science of trauma from the fields of clinical behavioral and evolutionary psychology and neuroscience I read such autobiographical projects not as symptoms but as complex interrogative negotiations of trauma and its aftermath
