The Story of the Heavens Robert S. Ball, 2022-07-20

The Story of the Heavens is the title of our book. We have indeed a wondrous story to narrate and could we tell it adequately it would prove of boundless interest and of exquisite beauty. It leads to the contemplation of grand phenomena in nature and great achievements of human genius. Let us enumerate a few of the questions which will be naturally asked by one who seeks to learn something of those glorious bodies which adorn our skies. What is the Sun, how hot, how big, and how distant? Whence comes its heat? What is the Moon? What are its landscapes like? How does our satellite move? How is it related to the earth? Are the planets globes like that on which we live? How large are they, and how far off? What do we know of the satellites of Jupiter, and of the rings of Saturn? How was Uranus discovered? What was the intellectual triumph which brought the planet Neptune to light? Then, as to the other bodies of our system, what are we to say of those mysterious objects, the comets? Can we discover the laws of their seemingly capricious movements? Do we know anything of their nature, and of the marvelous tails with which they are often decorated? What can be told about the shooting stars which so often dash into our atmosphere and perish in a streak of splendor? Such are a few of the questions which occur when we ponder on the mysteries of the heavens.
