A History of Seafaring Based on Underwater Archaeology George Fletcher Bass, 1972 **A History of seafaring** George F. Bass, 1972 **A History of Seafaring** George F. Bass, 1972 **The Oxford Handbook of Maritime Archaeology**

Alexis Catsambis, Ben Ford, Donny L. Hamilton, 2014-02 This title is a comprehensive survey of maritime archaeology as seen through the eyes of nearly fifty scholars at a time when maritime archaeology has established itself as a mature branch of archaeology **A Maritime Archaeology of Ships** J. R. Adams, 2013-12-11 In the last fifty years the investigation of maritime archaeological sites in the sea in the coastal zone and in their interconnecting locales has emerged as one of archaeology's most dynamic and fast developing fields No longer a niche interest maritime archaeology is recognised as having central relevance in the integrated study of the human past Within maritime archaeology the study of watercraft has been understandably prominent and yet their potential is far from exhausted In this book Jon Adams evaluates key episodes of technical change in the ways that ships were conceived designed built used and disposed of As technological puzzles they have long confounded explanation but when viewed in the context of the societies in which they were created mysteries begin to dissolve Shipbuilding is social practice and as one of the most complex artefacts made changes in their technology provide a lens through which to view the ideologies strategies and agency of social change Adams argues that the harnessing of shipbuilding was one of the ways in which medieval society became modern and while the primary case studies are historical he also demonstrates that the relationships between ships and society have key implications for our understanding of prehistory in which seafaring and communication had similarly profound effects on the tide of human affairs

Reconstructing a Maritime Past Matthew Harpster, 2022-12-30 *Reconstructing a Maritime Past* argues that rather than applying geo ethnic labels to shipwrecks to describe Greek or Roman seafaring a more intriguing alternative emphasizes a maritime culture's valorization of the Mediterranean Sea Doing so creates new questions and research agendas to understand the past human relationship with the sea This study makes this argument in three sections Chapters 1 and 2 contrasting intellectual histories of maritime archaeological interpretive approaches common in Northern Europe and the Mediterranean propose that the former perspective which embodies contemporary and fluid perceptions of culture is a better theoretical framework for future research Chapters 3 5 re interpret the corpus of submerged sites in the Mediterranean Sea with this approach arguing that this dataset does not represent Phoenician Muslim or Byzantine seafaring but the practices of a maritime culture Key to this section is the author's method that utilizes superimposed polygons to model patterns of maritime activity generating centennial results at different scales Having built the models of a maritime culture's valorization of the Mediterranean Sea Chapter 6 contains the first comparisons of these models to other datasets questioning the relevance of textual media to understand maritime activity while finding closer analogues with other archaeological corpora By deconstructing interpretive methods in maritime archaeology offering a new synthesizing interpretive approach that is

scalable and decoupled from past perceptions and critically examining the applicability of various media to illuminate the past maritime experience this book will appeal to scholars at various stages of their careers

The Protection of the Underwater Cultural Heritage: An Emerging Objective of the Contemporary Law of the Sea Anastasia

Strati, 2021-09-27 The marine environment is almost ideal for the preservation of artefacts and until relatively recently it also provided complete protection from destruction by man However the aqualung has made most shallow underwater sites accessible leading to widespread plundering Current deep sea bed technology now threatens deep water sites There is a need for immediate international action to preserve the man made environment alongside the natural one The enunciation of legal rules to protect the underwater cultural heritage is a complex issue involving a matrix of interests and laws both international and national

Ships' Fastenings Michael McCarthy, 2005-09-14 Without effective and durable hull fastenings boats and ships from the earliest days of seafaring through the twentieth century could not have plied the seas In *Ships' Fastenings* this central element of boat construction receives its first detailed study Author Michael McCarthy offers a fascinating thorough description of a range from sewn plank boats of the ancient world and Micronesia to Viking ships Mediterranean caravels nineteenth century ocean clippers and even steamships Along with the comprehensive account of ship fastenings McCarthy provides a history of many of the discoveries and innovations that accompanied changes in the kinds of fastenings used and the ways they were secured He discusses copper sheathing metallurgy the advent of Muntz metal rivets of all types welding in the ancient and modern sense and the types of non magnetic fastenings needed on World War II minesweepers He even takes a glance at the development of underwriting and insurance because the registries kept by Lloyd's and others were not only guides to the suitability of a particular ship but also dictated the form and method of fastening *Ships' Fastenings* will prove of value to shipbuilders historians and archaeologists It is also written for the enthusiast and amateur boat builder

Maritime Archaeology Keith Muckelroy, 1978 Maritime archaeology the scientific investigation of the relics of past ships and seafaring has come into being as a distinctive sub discipline of archaeology only since the wartime invention of the aqualung Keith Muckelroy sets out to define maritime archaeology highlighting on the one hand factors that are unique to working under water and on the other problems of interpretation and method that are shared with its parent discipline archaeology

The Oxford Handbook of Engineering and Technology in the Classical World John Peter Oleson, 2008 Nearly every aspect of daily life in the Mediterranean world and Europe during the florescence of the Greek and Roman cultures is relevant to engineering and technology This text highlights the accomplishments of the ancient societies the research problems and stimulates further progress in the history of ancient technology
