A Journey Round My Skull:

A Journey Round My Skull Frigyes Karinthy, 1949 **A Journey Round My Skull. Translated from the Hungarian by Vernon Duckworth Barker** Frigyes Karinthy, 1939 **A Journey Round My Room** Xavier de Maistre, 1885 *The DNA of Pediatric Neurosurgery* Hannes Haberl, 2025-07-25

Highly specialized fields like pediatric neurosurgery evolve in the hands of a small but international group of dedicated experts As such comprehensive training requires a large degree of mobility Hannes Haberl the editor of this book looks back on 20 years of productive sometimes surprising but always profitable encounters with respected colleagues in order to review and extend his personal range of approaches and surgical techniques This book is the result of very personal communications between the editor and 25 of the most experienced pediatric neurosurgeons Introducing their very personal attitudes and approaches the authors offer also surgical tips tricks and insights which have proven useful in daily surgical practice and education Although or precisely because not a conventional textbook it is highly recommendable for neuro surgeons neurologists pediatricians and interested members of related disciplines *The English Catalogue of Books Published from January, 1835, to January, 1863*, 1864 **The Routledge Handbook of Postcolonial Disability Studies** Tsitsi Chataika, Dan Goodley, 2024-03-29

This book centres and explores postcolonial theory which looks at issues of power economics politics religion and culture and how these elements work in relation to colonial supremacy It argues that disability is a constitutive material presence in many postcolonial societies and that progressive disability politics arise from postcolonial concerns By drawing these two subjects together this handbook challenges oppression voicelessness stereotyping undermining neo colonisation and postcolonisation and bridges binary debate between global North and the global South The book is divided into eight sections Setting the Scene Decolonising Disability Studies Postcolonial Theory Inclusive Development Postcolonial Disability Studies and Disability Activism Postcolonial Disability and Childhood Studies Postcolonial Disability Studies and Education Postcolonial Disability Studies Gender Race and Religion Conclusion And comprised of 27 newly written chapters this book leads with postcolonial perspectives closely followed by an engagement with critical disability studies with the explicit aim of foregrounding these contributions pulling them in from the edges of empirical and theoretical work where they often reside in mainstream academic literature The book will be of interest to all scholars and students of disability studies and postcolonial studies as well as those working in sociology literature and development studies *Trepanation, Trephining and Craniotomy* José M González-Darder, 2019-09-04

This book takes readers on a journey around the world and through time accompanied by a modern neurosurgeon who reviews historical techniques and instruments used for cranial opening The author draws on original medical and surgical books to provide a comprehensive history of these techniques and tools To complement the general overview and offer readers a more hands on sense of context and atmosphere extensive historical references stories media news and illustrative cases have been included for each historical and geographical scenario In addition original

illustrations and plates of these archaic instruments and techniques are supplied Neurosurgical surgeons nurses technicians medical historiographers paleo pathologists and researchers interested in surgical techniques for cranial opening will find the volume a valuable guide intended to increase the historical and cultural awareness of this core topic in neurological surgery

The Oxford Guide to Literature in English Translation Peter France, 2000 This guide highlights the place of translation in our culture encouraging awareness of the process of translating and the choices involved making the translator more visible Concentrating on major writers and works it covers translations out of many languages from Greek to Hungarian Korean to Turkish For some works e g Virgil's Aeneid which have been much translated the discussion is historical and critical showing how translation has evolved over the centuries and bringing out the differences between versions Elsewhere with less familiar literatures the Guide examines the extent to which translation has done justice to the range of work available

Sound and Sense in Contemporary Theatre Matthew Tomkinson, 2025-01-11 This book is among the first to consider the subject of mad auralities in theatre and performance asking what does it mean to hear and listen madly Drawing widely upon mad studies critical disability studies theatre studies sound studies queer studies and critical race theory it seeks to explore the theatrical relationship between sound and mental health differences by examining a range of case studies in which audience members are immersed in auditory simulations of madness Ultimately however this critical study investigates the shortcomings of simulation as a representational practice in keeping with the critical tradition of disability studies and mad studies
