The Criminal Justice System and Health Care Charles A. Erin, Suzanne Ost, 2007 This book examines questions of medical accountability and ethics It analyses how the criminal justice system regulates health care practice and to what extent it can and should be used as a tool to resolve ethical conflict in health care For most of the twentieth century criminal courts were engaged in matters relating to medicine principally as a forum to resolve ethical controversies over the sanctity of life However the judiciary approached this function with reluctance and a marked tendency to defer to the medical profession to define what constituted ethical and thus lawful conduct However over the past 25 years criminal courts have increasingly been drawn into these types of question and the criminal law has become a major actor in the resolution of ethical conflict The trend to prosecute for aberrant professional conduct or medical malpractice and the role of the criminal process in medicine has been analytically neglected in the UK There is scant literature addressing the appropriate boundaries of the criminal process in resolving ethical conflict the theoretical legal analysis of the law s relationship with health care or the practical impact of the criminal justice system on professionals and the delivery of health care in the UK This volume addresses these issues via a combination of theoretical analyses and key case studies drawing on the experiences of other carefully selected jurisdictions It places a particular emphasis on the appropriateness of the involvement of the criminal justice system in health care the limitations of this developing trend and solutions to the problems that arise from it
